Part 1 – Annual Budget

1.1 Mayor's Report

Management within local government has a significant role to play in strengthening the link between the citizen and government's overall priorities and spending plans. The goal should be to enhance service delivery aimed at improving the quality of life for all people within the Umsobomvu Municipality. Budgeting is primarily about the choices that the municipality has to make between competing priorities and fiscal realities. The challenge is to do more with the available resources. We need to remain focused on the effective delivery of the core municipal services through the application of efficient and effective service delivery mechanisms.

The application of sound financial management principles for the compilation of the Municipality's financial plan is essential and critical to ensure that the Municipality remains financially viable and that sustainable municipal services are provided economically and equitably to all communities.

31 March 2015
NL HERMANS

1.2 Council Resolutions

On 31 March 2015 the Council of Umsobomvu Municipality Local Municipality met in the Council Chambers of Umsobomvu Municipality to consider the draft annual budget of the municipality for the financial year 2015/2016. The Council approved and adopted the following resolutions:

1. The Council of Umsobomvu Municipality Local Municipality, acting in terms of section 24 of the Municipal Finance Management Act, (Act 56 of 2003) approves and adopts:
 - 1.1. The annual budget of the municipality for the financial year 2015/2016 and the multi-year and single-year capital appropriations as set out in the following tables:
 - 1.1.1. Budgeted Financial Performance (revenue and expenditure by standard classification) as contained in Table 18 on page 24;
 - 1.1.2. Budgeted Financial Performance (revenue and expenditure by municipal vote) as contained in Table 19 on page 26;
 - 1.1.3. Budgeted Financial Performance (revenue by source and expenditure by type) as contained in Table 21 on page 28; and
 - 1.1.4. Multi-year and single-year capital appropriations by municipal vote and standard classification and associated funding by source as contained in Table 22 on page 30.
 - 1.2. The financial position, cash flow budget, cash-backed reserve/accumulated surplus, asset management and basic service delivery targets are approved as set out in the following tables:
 - 1.2.1. Budgeted Financial Position as contained in Table 23 on page 32;
 - 1.2.2. Budgeted Cash Flows as contained in Table 24 on page 34;
 - 1.2.3. Cash backed reserves and accumulated surplus reconciliation as contained in Table 25 on page 34;
 - 1.2.4. Asset management as contained in Table 26 on page 36; and
 - 1.2.5. Basic service delivery measurement as contained in Table 27 on page 38.

2. The Council of Umsobomvu Municipality Local Municipality, acting in terms of section 75A of the Local Government: Municipal Systems Act (Act 32 of 2000) approves and adopts with effect from 1 July 2015
 - 2.1. the tariffs for property rates – as set out in Annexure B,
 - 2.2. the tariffs for electricity – as set out in Annexure B
 - 2.3. the tariffs for the supply of water – as set out in Annexure B
 - 2.4. the tariffs for sanitation services – as set out in Annexure B
 - 2.5. the tariffs for solid waste services – as set out in Annexure B
3. The Council of Umsobomvu Municipality Local Municipality, acting in terms of 75A of the Local Government: Municipal Systems Act (Act 32 of 2000) approves and adopts with effect from 1 July 2015 the tariffs for other services, as set out in Annexure G1 to G21 respectively.
4. To give proper effect to the municipality's annual budget, the Council of Umsobomvu Municipality Local Municipality approves:
 - 4.1. That cash backing is implemented through the utilisation of a portion of the revenue generated from property rates to ensure that all capital reserves and provisions, unspent long-term loans and unspent conditional grants are cash backed as required in terms of the municipality's funding and reserves policy as prescribed by section 8 of the Municipal Budget and Reporting Regulations.

1.3 Executive Summary

The application of sound financial management principles for the compilation of the Municipality's financial plan is essential and critical to ensure that the Municipality remains financially viable and that municipal services are provided sustainably, economically and equitably to all communities.

The Municipality's business and service delivery priorities were reviewed as part of this year's planning and budget process. Where appropriate, funds were transferred from low- to high-priority programmes so as to maintain sound financial stewardship. A critical review was also undertaken of expenditures on noncore and 'nice to have' items. This has resulted in savings to the municipality of nearly R.393 million or 1.8 percent of the current financial year's adjusted budget. Key areas where savings were realized were on telephone and internet usage, printing, workshops, travel, accommodation, and catering.

The Municipality has embarked on implementing a range of revenue collection strategies to optimize the collection of debt owed by consumers. Furthermore, the Municipality has undertaken various customer care initiatives to ensure the municipality truly involves all citizens in the process of ensuring a people lead government.

National Treasury's MFMA Circular No. 74 and 75 were used to guide the compilation of the 2015/2016 MTREF.

The main challenges experienced during the compilation of the 2015/2016 MTREF can be summarised as follows:

- The ongoing difficulties in the national and local economy;
- Aging and poorly maintained water, roads and electricity infrastructure;
- The need to reprioritise projects and expenditure within the existing resource envelope given the cash flow realities and declining cash position of the municipality;

- The increased cost of bulk water and electricity (due to tariff increases Eskom), which is placing upward pressure on service tariffs to residents. Continuous high tariff increases are not sustainable - as there will be point where services will no-longer be affordable;
- Affordability of capital projects – original allocations had to be reduced and the operational expenditure associated with prior year’s capital investments needed to be factored into the budget as part of the 2015/2016 MTREF process; and
- Availability of affordable capital/borrowing.

The following budget principles and guidelines directly informed the compilation of the 2015/2016 MTREF:

- The 2014/15 Adjustments Budget priorities and targets, as well as the base line allocations contained in that Adjustments Budget were adopted as the upper limits for the new baselines for the 2015/2016 annual budget;
- Intermediate service level standards were used to inform the measurable objectives, targets and backlog eradication goals;
- Tariff and property rate increases should be affordable and should generally not exceed inflation as measured by the CPI, except where there are price increases in the inputs of services that are beyond the control of the municipality, for instance the cost of bulk water and electricity. In addition, tariffs need to remain or move towards being cost reflective, and should take into account the need to address infrastructure backlogs;
- There will be no budget allocated to national and provincial funded projects unless the necessary grants to the municipality are reflected in the national and provincial budget and have been gazetted as required by the annual Division of Revenue Act;
- An upper limit of R135 million was set for the following items and allocations to these items had to be supported by a list and/or motivation setting out the intention and cost of the expenditure which was used to prioritise expenditures:
 - Special Projects;
 - Furniture and office equipment;
 - Refreshments and entertainment;
 - Ad-hoc travelling; and
 - Subsistence, Travelling & Conference fees (national & international).

In view of the aforementioned, the following table is a consolidated overview of the proposed 2015/2016 Medium-term Revenue and Expenditure Framework:

Table 1 Consolidated Overview of the 2015/2016 MTREF

R Thousand	Adjustment Budget 2014/2015	Budget Year 2015/2016	Budget Year + 1 2016/2017	Budget Year + 2 2017/2018
Total operating Revenue	R 109,125	R 119,018	R 125,238	R 131,221
Total Operating Expenditure	R 130,553	R 135,300	R139,787	R147,448
(Surplus) Deficit	(R 21,428)	(R 16,282)	(R14,549)	(R 16,227)
Total Capital Expenditure	R 46,841	R 57,113	R 26,948	R 22,832

Total operating revenue has remained the same for the 2015/2016 financial year when compared to the 2014/15 Adjustments Budget mainly due to operational grants received for special projects that was received in the 2014/2015 financial year. For the two outer years, operational revenue will increase by 5.23 and 4.78 per cent respectively, equating to a total revenue growth of R22, 096 million over the MTREF when compared to the 2014/15 financial year.

Total operating expenditure for the 2015/2016 financial year has been appropriated at R135.300 million and translates into a budgeted deficit of R 16.282 million. When compared to the 2014/15 Adjustments Budget, operational expenditure has decreased by 3.64 per cent in the 2015/2016 budget and increased by 3.31 and 5.48 per cent for each of the respective outer years of the MTREF. The operating deficit for the two outer years increases to R14.549m in 2016/17 and then results in a deficit of R16.227m in 2017/18. These deficits are non-cash related and are due to the council providing for infrastructure impairment and depreciation.

The capital budget of R57.113 million for 2015/2016 is 21.93 per cent more when compared to the 2014/15 Adjustment Budget. The increase is a result of some projects being completed and some close to completion. The capital programme decreases to R26.948 million in the 2016/2017 financial year and then decreases by 15.27 per cent in 2017/18 to R 22.832 million. All capital over the MTREF will be financed by Grants from National and own revenue.

Note that the Municipality has reached its prudential borrowing limits and so there is very little scope to substantially increase these borrowing levels over the medium-term. The repayment of capital and interest (debt services costs) has remained the same and will continue over the next five years due to new loans taken up in the past year, as a result of the need to replace specialised vehicles needed to meet the increased demand in services to be delivered. Consequently, the capital budget remains relatively flat over the medium-term.

1.4 Operating Revenue Framework

For Umsobomvu Municipality to continue improving the quality of services provided to its citizens it needs to generate the required revenue. In these tough economic times strong revenue management is fundamental to the financial sustainability of every municipality. The reality is that we are faced with development backlogs and poverty. The expenditure required to address these challenges will inevitably always exceed available funding; hence difficult choices have to be made in relation to tariff increases and balancing expenditures against realistically anticipated revenues.

The municipality's revenue strategy is built around the following key components:

- National Treasury's guidelines and macroeconomic policy;
- Growth in the Municipality and continued economic development;
- Efficient revenue management, which aims to ensure a 95 per cent annual collection rate for property rates and other key service charges;
- Electricity tariff increases as approved by the National Electricity Regulator of South Africa (NERSA);
- Achievement of full cost recovery of specific user charges especially in relation to trading services;
- Determining the tariff escalation rate by establishing/calculating the revenue requirement of each service;

- The municipality's Property Rates Policy approved in terms of the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA);
- Increase ability to extend new services and recover costs;
- The municipality's Indigent Policy and rendering of free basic services; and
- Tariff policies of the Municipality.

The following table is a summary of the 2015/2016 MTREF (classified by main revenue source):

Table 1 Summary of revenue classified by main revenue

Description	Current Year 2014-2015			2015/16 Medium Term Revenue & Expenditure Framework		2016/17 Medium Term Revenue & Expenditure Framework	2017/18 Medium Term Revenue & Expenditure Framework
	Original Budget	Adjusted Budget	Full Year Forecast	Budget Year 2015/16	% Increased/ (Decreased)	Budget Year 2016/17	Budget Year 2017/18
R thousand							
<u>Revenue By Source</u>							
Property rates	5 031	8 117	8 117	8 117	0%	8 604	9 120
Property rates - penalties & collection charges	169	179	179	179	0%	189	201
Service charges - electricity revenue	27 753	27 860	27 860	31 258	12%	33 530	35 662
Service charges - water revenue	9 931	12 385	12 385	13 549	9%	14 403	15 267
Service charges - sanitation revenue	7 418	7 792	7 792	8 524	9%	9 035	9 577
Service charges - refuse revenue	5 726	5 975	5 975	6 537	9%	6 929	7 344
Service charges - other	-						
Rental of facilities and equipment	396	1 042	1 042	1 103	6%	1 167	1 235
Interest earned - external investments	312	422	422	422	0%	422	422
Interest earned - outstanding debtors	1 427	1 672	1 672	1 843	10%	1 804	1 881
Dividends received	-						
Fines	1 575	2 019	2 019	2 521	25%	2 646	2 777
Licences and permits	710	714	714	757	6%	795	834
Agency services	-						
Transfers recognised - operational	36 664	36 664	36 664	39 919	9%	44 019	52 197
Other revenue	4 190	4 285	4 285	4 291	0%	4 695	4 701
Gains on disposal of PPE							
Total Revenue (excluding capital transfers and contributions)	101 301	109 125	109 125	119 018	9.07%	128 238	141 221

In line with the formats prescribed by the Municipal Budget and Reporting Regulations, capital transfers and contributions are excluded from the operating statement, as inclusion of these revenue sources would distort the calculation of the operating surplus/deficit.

Revenue generated from rates and services charges forms a significant percentage of the revenue basket for the Municipality. Rates and service charge revenues comprise more than half of the total revenue mix. In the 2014/15 financial year, revenue from rates and services charges totalled R 62.308 million or 57.10 per cent. This increases to R68.164 million, R 72.690 million and R77.172 million in the respective financial years of the MTREF. The above table excludes revenue foregone arising from discounts and rebates associated with the tariff policies of the Municipality. Details in this regard are contained in Table 64 MBRR SA1 (see page 118).

Property rates revenue source from services totalling 13.03 per cent or R8.117 million rand in 2015/16. The smallest source is 'other revenue' which consists of various items such as income received from permits and licenses, building plan fees, connection fees, transport fees and advertisement fees. Departments have been urged to review the tariffs of these items on an annual basis to ensure they are cost reflective and market related.

Operating grants and transfers totals R 39.919 million in the 2015/2016 financial year and steadily increases to R41.019 million by 2016/17. Note that the year-on-year increase for the 2015/2016 financial year is 8.88 per cent and then increases by 2.76 and 2.87 per cent in the two outer years. The following table gives a breakdown of the various operating grants and subsidies allocated to the municipality over the medium term:

Tariff-setting is a pivotal and strategic part of the compilation of any budget. When rates, tariffs and other charges were revised, local economic conditions, input costs and the affordability of services were taken into account to ensure the financial sustainability of the Municipality.

National Treasury continues to encourage municipalities to keep increases in rates, tariffs and other charges as low as possible. Municipalities must justify in their budget documentation all increases in excess of the 6 per cent upper boundary of the South African Reserve Bank's inflation target. Excessive increases are likely to be counterproductive, resulting in higher levels of non-payment.

The percentage increases of Eskom bulk tariffs are far beyond the mentioned inflation target. Given that these tariff increases are determined by external agencies, the impact they have on the municipality's electricity and in these tariffs are largely outside the control of the Municipality. Discounting the impact of these price increases in lower consumer tariffs will erode the Municipality's future financial position and viability.

It must also be appreciated that the consumer price index, as measured by CPI, is not a good measure of the cost increases of goods and services relevant to municipalities. The basket of goods and services utilised for the calculation of the CPI consist of items such as food, petrol and medical services, whereas the cost drivers of a municipality are informed by items such as the cost of remuneration, bulk purchases of electricity and water, petrol, diesel, chemicals, cement etc. The current challenge facing the Municipality is managing the gap between cost drivers and tariffs levied, as any shortfall must be made up by either operational efficiency gains or service level reductions. Within this framework the Municipality has undertaken the tariff setting process relating to service charges as follows.

1.4.1 Property Rates

Property rates cover the cost of the provision of general services. Determining the effective property rate tariff is therefore an integral part of the municipality's budgeting process.

National Treasury's MFMA Circular No. 51 deals, inter alia with the implementation of the Municipal Property Rates Act, with the regulations issued by the Department of Co-operative Governance. These regulations came into effect on 1 July 2009 and prescribe the rate ratio for the non-residential categories, public service infrastructure and agricultural properties relative to residential properties to be 0,25:1. The implementation of these regulations was done in the previous budget process and the Property Rates Policy of the Municipality has been amended accordingly.

The following stipulations in the Property Rates Policy are highlighted:

- The first R15 000 of the market value of a property used for residential purposes is excluded from the rate-able value (Section 17(h) of the MPRA). ;
- 20 per cent rebate will be granted on all state owned properties
- 100 per cent rebate will be granted to registered indigents in terms of the Indigent Policy;
- For pensioners, physically and mentally disabled persons, a maximum/total rebate of 50 per cent (calculated on a sliding scale) will be granted to owners of rate-able property if the total gross income of the applicant and/or his/her spouse, if any, does not exceed the amount equal to twice the annual state pension as approved by the National Government for a financial year. In this regard the following stipulations are relevant:
 - The rate-able property concerned must be occupied only by the applicant and his/her spouse, if any, and by dependants without income;

- The applicant must submit proof of his/her age and identity and, in the case of a physically or mentally handicapped person, proof of certification by a Medical Officer of Health, also proof of the annual income from a social pension;
 - The applicant’s account must be paid in full, or if not, an arrangement to pay the debt should be in place; and
 - The property must be categorized as residential.
- The Municipality may award a 100 per cent grant-in-aid on the assessment rates of rate-able properties of certain classes such as registered welfare organizations, institutions or organizations performing charitable work, sports grounds used for purposes of amateur sport. The owner of such a property must apply to the Chief Financial Officer in the prescribed format for such a grant.

The categories of rate-able properties for purposes of levying rates and the proposed rates for the 2015/2016 financial year based on a 0 per cent increase from 1 July 2015 is contained below:

Category	Current Tariff (1 July 2014)	Proposed Tariff (From 1 July 2015)
Residential Properties	0.010879	0.010879
State Owned Properties	0.017541	0.017541
Business & Commercial	0.012869	0.012869
Agricultural	0.002720	0.002720

1.4.2 Sale of Water and Impact of Tariff Increases

South Africa faces similar challenges with regard to water supply as it did with electricity, since demand growth outstrips supply. Consequently, National Treasury is encouraging all municipalities to carefully review the level and structure of their water tariffs to ensure:

- Water tariffs are fully cost-reflective – including the cost of maintenance and renewal of purification plants, water networks and the cost associated with reticulation expansion;
- Water tariffs are structured to protect basic levels of service and ensure the provision of free water to the poorest of the poor (indigent); and
- Water tariffs are designed to encourage efficient and sustainable consumption.

In addition National Treasury has urged all municipalities to ensure that water tariff structures are cost reflective by 2014.

Better maintenance of infrastructure, new dam construction and cost-reflective tariffs will ensure that the supply challenges are managed in future to ensure sustainability.

A tariff increase of 6 per cent from 1 July 2015 for water is proposed. This is based on input cost of inputs increasing by 6 per cent and the commissioning of the extended water treatment works. In addition 6 kℓ water per 30-day period will again be granted at a subsidized price to all indigent residents.

A summary of the proposed tariffs for households (residential) and non-residential are as follows:

Table 6 Proposed Water Tariffs

Category	Current Tariffs 2014/15 Rand per kl	Proposed Tariffs 2015/16 Rand per kl	Percentage Change
Residential			
(i) 0 to 6 kl per 30-day period	4.44	4.7	6%
(ii) 7 to 20 kl per 30-day period	5.36	5.68	6%
(iii) 21- 30kl per 20-day period	6.89	7.3	6%
(iv) 30+	9.09	9.64	6%
Non Residential			
(i) 0-60kl per 30-day period	6.52	6.91	6%
(ii) 61kl per 30-day period	8.76	9.28	6%

The following table shows the impact of the proposed increases in water tariffs on the water charges for a single dwelling-house:

Table 7 Comparison Between Current Water Charges and Increases (Domestic)

Monthly Consumption Kl	Current Amount Payable R	Proposed Amount Payable R	Difference (Increase) R	Percentage Change %
20	R 112.86	R 119.56	R 6.70	6%
30	R 188.26	R 199.45	R 11.19	6%
40	R 293.96	R 311.55	R 17.59	6%

The tariff structure of the 2015/2016 financial year has not been changed. The tariff structure is designed to charge higher levels of consumption a higher rate, steadily increasing to a rate of R 9.64 per kilolitre for consumption in excess of 30kl per 30 day period.

1.4.3 Sale of Electricity and Impact of Tariff Increases

NERSA has announced the revised bulk electricity pricing structure. An 14.24 per cent increase in the Eskom bulk electricity tariff to municipalities will be effective from 1 July 2015.

Considering the Eskom increases, the consumer tariff had to be increased by 12.2 per cent to offset the additional bulk purchase cost from 1 July 2015. Furthermore, it should be noted that given the magnitude of the tariff increase, it is expected to depress growth in electricity consumption, which will have a negative impact on the municipality’s revenue from electricity.

Registered indigents will again be granted 50 kWh per 30-day period being subsidised through the equitable share.

The following table shows the impact of the proposed increases in electricity tariffs on the electricity charges for domestic customers:

Table 8 Comparison Between Current Electricity Charges And Increases (Domestic)

Monthly Consumption Kwh	Current Amount Payable R	Proposed Amount Payable R	Difference Increase R	Percentage Change %
100	R 94.80	R 106.36	R 11.56	12.2%
250	R 251.89	R 282.63	R 30.74	12.2%
500	R 570.48	R 640.08	R 69.60	12.2%
750	R 970.28	R 1,088.64	R 118.36	12.2%
1000	R 1,390.93	R 1,560.61	R 169.68	12.2%
2000	R 3,074.60	R 3,449.62	R 375.02	12.2%

It should further be noted that NERSA has advised that a stepped tariff structure needs to be implemented from 1 July 2011. The effect thereof will be that the higher the consumption, the higher the cost per kWh. The aim is to subsidise the lower consumption users (mostly the poor). The Municipality has entered into discussions with NERSA regarding the suitability of the NERSA proposed stepped tariffs compared to those already being implemented by the Municipality already. Until the discussions are concluded, the Municipality will maintain the current stepped structure of its electricity tariffs.

The inadequate electricity bulk capacity and the impact on service delivery and development remains a challenge for the Municipality. Most of the suburbs and inner Municipality reticulation network was designed or strengthened in the early 1980's with an expected 20-25 year life-expectancy. The upgrading of the Municipality's electricity network has therefore become a strategic priority, especially the substations and transmission lines.

Owing to the high increases in Eskom's bulk tariffs, it is clearly not possible to fund these necessary upgrades through increases in the municipal electricity tariff – as the resultant tariff increases would be unaffordable for the consumers. . As part of the 2015/2016 and 2016/2017 medium-term capital programme, funding has been allocated to electricity infrastructure to decrease expenditure through alternative energy and consumption reducing equipment.

Sanitation and Impact of Tariff Increases

A tariff increase of 6 per cent for sanitation from 1 July 2015 is proposed. This is based on the input cost assumptions related to water. It should be noted that electricity costs contributes approximately 20 per cent of waste water treatment input costs, therefore the higher than CPI increase of 6 per cent for sanitation tariffs. The following factors also contribute to the proposed tariff increase:

- Sanitation charges are calculated according to the type of consumer and the level of service provided as indicated in the table below;
- Subsidised sanitation will be applicable to registered indigents; and
- The commissioning of the new sludge activated Waste water Treatment works compared to the previous oxidation pond system

The total revenue expected to be generated from rendering this service amounts to R8.524 million for the 2015/2016 financial year.

The following table compares the current and proposed tariffs:

Table 3 Comparison between current sanitation charges and increases

Table 9 Comparison Between Current Sanitation Charges And Increases

Description	Current Year 2013/14	2014/15 Medium Term Revenue & Expenditure Framework

The following table shows the impact of the proposed increases in sanitation tariffs on the sanitation charges for a single dwelling-house:

Table 10 Comparison Between Current Sanitation Charges and Increases, Single Dwelling Houses

Monthly Sanitation Level of Service	Current Amount Payable R	Proposed Amount Payable R	Difference (Increase) %
Domestic - Conservancy tanks	69.41	73.58	6%
Domestic - Connected	92.68	98.24	6%

1.4.4 Waste Removal and Impact of Tariff Increases

Currently solid waste removal is operating at a small surplus. The main contributors to expenditure are repairs and maintenance on vehicles, increases in general expenditure such as petrol and diesel and the cost of remuneration.

A 6 per cent increase in the waste removal tariff is proposed from 1 July 2015. Higher increases will not be viable in 2015/2016 owing to the significant increases implemented in previous financial years as well as the overall impact of higher than inflation increases of other services. Any increase higher than 6 per cent would be counter-productive and will result in affordability challenges for individual rates payers raising the risk associated with bad debt.

The following table compares current and proposed amounts payable from 1 July 2014:

Table 11 Comparison Between Current Waste Removal Fees and Increases (Domestic)

	Current Tariffs 2014/2015		Proposed Tariffs 2015/2016		Difference (Increase) R	% Increase
	Waste Removal	Municipal Cleaning	Waste Removal	Municipal Cleaning		
Domestic- Monthly	64.9		R 68.79		R 3.89	6%
Additional Bin Per Month	22.11		23.44		R 1.33	6%
Business	93.45		99.05		R 5.60	6%
Garden Refuse Households	6.54		6.93		R 0.39	6%

1.4.5 Overall impact of tariff increases on households

The following table shows the overall expected impact of the tariff increases on a large and small household, as well as an indigent household receiving free basic services.

Note that in all instances the overall impact of the tariff increases on household's bills has been kept to between 7.4 and 7.6 per cent and 7.6 per cent for indigents.

1.5 Operating Expenditure Framework

The Municipality's expenditure framework for the 2015/16 budget and MTREF is informed by the following:

- The asset renewal strategy and the repairs and maintenance plan;

- Balanced budget constraint (operating expenditure should not exceed operating revenue) unless there are existing uncommitted cash-backed reserves to fund any deficit;
- Funding of the budget over the medium-term as informed by Section 18 and 19 of the MFMA;
- The capital programme is aligned to the asset renewal strategy and backlog eradication plan;
- Operational gains and efficiencies will be directed to funding the capital budget and other core services; and
- Strict adherence to the principle of *no project plans no budget*. If there is no business plan no funding allocation can be made.

The following table is a high level summary of the 2015/2016 budget and MTREF (classified per main type of operating expenditure):

Table 12 Summary of Operating Expenditure by Standard Classification Item

Expenditure by type	Current year 2014/15			2015/16 Medium Term Revenue & Expenditure Framework			
	Original Budget	Adjusted Budget	Full year Forecast	Budget year 2015/2016	% Increase (Decrease)	Budget year +1 2016/2017	Budget year +2 2017/2018

Total Expenditure	126,028,783.94	130,553,134.34	130,553,134.34	135,300,217.00	3.64%	139,786,721.00	147,448,025.00

The budgeted allocation for employee related costs for the 2015/2016 financial year totals R40.628 million, which equals 30.01 per cent of the total operating expenditure. In the absence of a collective SALGBC agreement, salary increases have been factored into this budget at a percentage increase of 4.4 per cent for the 2015/2016 financial year. An annual increase of 5.3 per cent and 6 per cent has been included in the two outer years of the MTREF. As part of the Municipality’s cost reprioritization and cash management strategy vacancies have been significantly rationalized downwards. In addition expenditure against overtime was significantly reduced, with provisions against this budget item only being provided for emergency services and other critical functions.

The cost associated with the remuneration of councillors is determined by the Minister of Co-operative Governance and Traditional Affairs in accordance with the Remuneration of Public Office Bearers Act, 1998 (Act 20 of 1998). The most recent proclamation in this regard has been taken into account in compiling the Municipality’s budget.

The provision of debt impairment was determined based on an annual collection rate of 85 per cent and the Debt Write-off Policy of the Municipality. For the 2015/2016 financial year this amount equates to R5.458 million and escalates to R5.806 million by 2016/17. While this expenditure is considered to be a non-cash flow item, it informed the total cost associated with

rendering the services of the municipality, as well as the municipality’s realistically anticipated revenues.

Provision for depreciation and asset impairment has been informed by the Municipality’s Asset Management Policy. Depreciation is widely considered a proxy for the measurement of the rate asset consumption. Note that the implementation of GRAP 17 accounting standard has meant bringing a range of assets previously not included in the assets register onto the register. This has resulted in a significant increase in depreciation relative to previous years.

Finance charges consist primarily of the repayment of interest on long-term borrowing (cost of capital). Finance charges make up 0.23 per cent (R.310 million) of operating expenditure excluding annual redemption for 2015/2016. As previously noted, the Municipality has reached its prudential limits for borrowing – hence the planned borrowing to finance the capital budget does not result in finance charges as a percentage of operational expenditure increasing – rather it decreases to 0.21 and 0.20 per cent over the MTREF.

Bulk purchases are directly informed by the purchase of electricity from Eskom and water from DWAF. The annual price increases have been factored into the budget appropriations and directly inform the revenue provisions. The expenditures include distribution losses.

Other materials comprise of amongst others the purchase of fuel, diesel, materials for maintenance, cleaning materials and chemicals. In line with the Municipality’s repairs and maintenance plan this group of expenditure has been prioritised to ensure sustainability of the Municipality’s infrastructure.

Other expenditure comprises of various line items relating to the daily operations of the municipality. This group of expenditure has also been identified as an area in which cost savings and efficiencies can be achieved. In the 2015/2016 it has increased by 0.14 per cent and increased by 9.42 and 0.13 per cent respectively in the outer years.

The following table gives a breakdown of the main expenditure categories for the 2015/2016 financial year.

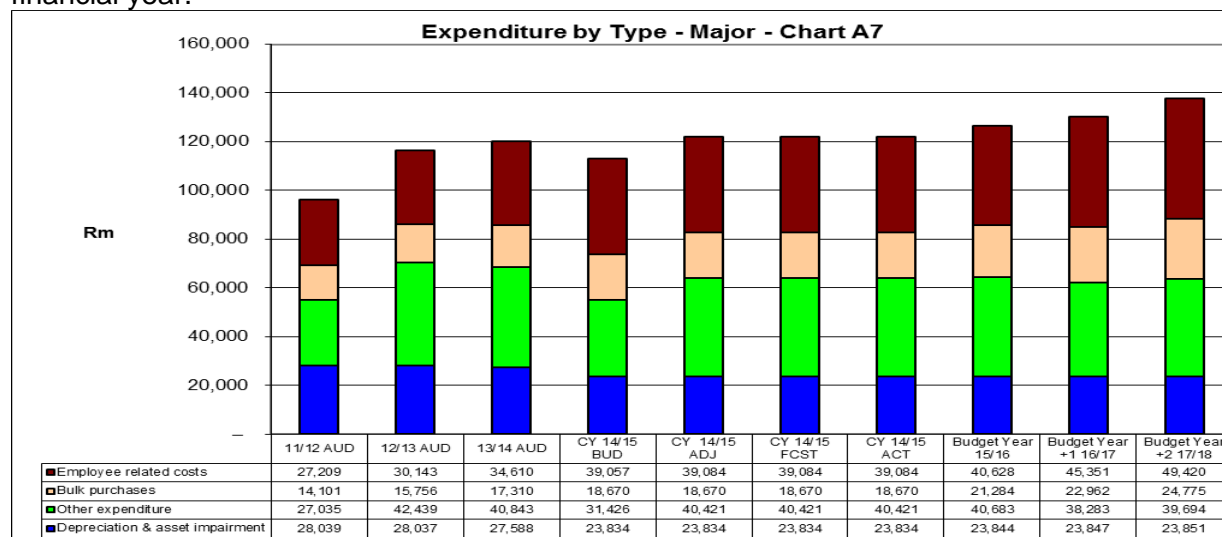

Figure 1 Main operational expenditure categories for the 2014/2015 financial year

1.5.1 Priority given to repairs and maintenance

Aligned to the priority being given to preserving and maintaining the Municipality's current infrastructure, the 2015/2016 budget and MTREF provide for extensive growth in the area of asset maintenance, as informed by the asset renewal strategy and repairs and maintenance plan of the Municipality. In terms of the Municipal Budget and Reporting Regulations, operational repairs and maintenance is not considered a direct expenditure driver but an outcome of certain other expenditures, such as remuneration, purchases of materials and contracted services.

During the compilation of the 2015/2016 MTREF operational repairs and maintenance was decreased owing to the fact that some of the Municipality's infrastructure has been upgraded and some vehicles are still new. To this end, repairs and maintenance was substantially increased by 11.37 per cent in the 2015/2016 financial year, from R3.678 million to R3.260 million. The total allocation for 2015/2016 equates to R3.260 million, a decrease of 11.37 per cent in relation to the Adjustment Budget and continues to decrease at 5.28 and increases by 0.23 per cent over the MTREF respectively. In relation to the total operating expenditure, repairs and maintenance comprises of 2.41, 2.21 and 2.10 per cent for the respective financial years of the MTREF. This is mainly due to bulk electricity purchases that continually exceed growth in other expenditure items.

The table below provides a breakdown of the repairs and maintenance in relation to asset class:

For the 2015/2016 financial year, 55.82 per cent or R1.831 million of total repairs and maintenance will be spent on infrastructure assets. Electricity infrastructure has received a significant proportion of this allocation totalling 44.29 per cent (R.811million), followed by water infrastructure at 32.28 per cent (R.591 million), roads at 20.21 per cent (R.370 million) and roads at 19.12 per cent (R.350 million). Community assets have been allocated R.010 million of total repairs and maintenance.

1.5.2 Free Basic Services: Basic Social Services Package

The social package assists households that are poor or face other circumstances that limit their ability to pay for services. To receive these free services the households are required to register in terms of the Municipality's Indigent Policy. The target is to register 3782 or more indigent households during the 2014/2015 financial year, a process reviewed annually. Detail relating to free services, cost of free basis services, revenue lost owing to free basic services as well as basic service delivery measurement is contained in Table 27 MBRR A10 (Basic Service Delivery Measurement) on page 38.

The cost of the social package of the registered indigent households is largely financed by national government through the local government equitable share received in terms of the annual Division of Revenue Act.

1.6 Capital expenditure

The following table provides a breakdown of budgeted capital expenditure by vote:

For 2015/2016 an amount of R 57.113 million has been appropriated for the development of infrastructure which represents 100 per cent of the total capital budget. In the outer years this amount totals R26.948 million, 100 per cent and R22.832 million, 100 per cent respectively for each of the financial years. Water services receives the highest allocation of R 47.563 million in 2015/2016 which equates to 83.28 per cent followed by electricity services at 12.26 per cent, R7 million.

Total new assets represent 100 per cent or R 57.113 million of the total capital budgets. Further detail relating to asset classes and proposed capital expenditure is contained in Table 26 MBRR

A9 (Asset Management) on page 46 and 47. In addition to the MBRR Table A9, MBRR Tables SA34a and SA34c provides a detailed breakdown of the capital programme relating to new asset construction as well as operational repairs and maintenance by asset class (refer to pages 109, 110 and 111). Some of the salient projects to be undertaken over the medium-term includes, amongst others:

- Electricity for all (retrofitting of street lights) – R7 million;
- Bulk supply and backlog eradication of water – R36.872 million;
- Norvalspont internal sewerage network – R10.691
- Block paving of streets – R1 million;

Furthermore pages 112 to 114 contain a detail breakdown of the capital budget per project over the medium-term.

The following graph provides a breakdown of the capital budget to be spent on infrastructure related projects over the MTREF.

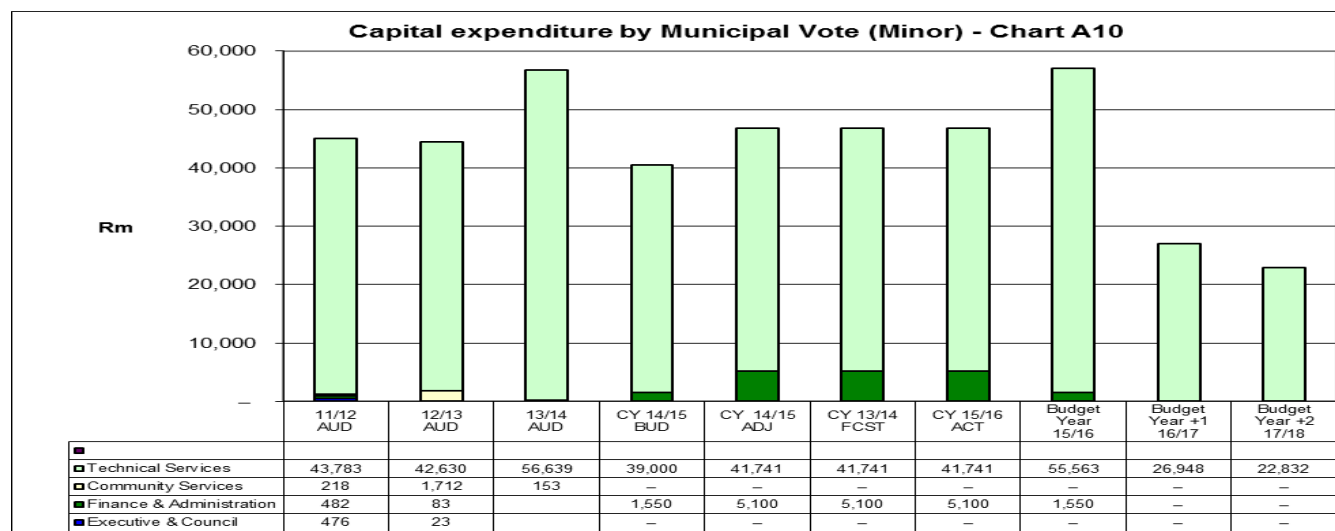

Figure 2 Capital Infrastructure Programme

1.6.1 Future operational cost of new infrastructure

The future operational costs and revenues associated with the capital programme have been included in the MTREF expenditure. This concomitant operational expenditure is expected to escalate to R2 million by 2016/17 and to R1.500 million by 2017/18. It needs to be noted that as part of the 2015/16 MTREF, this expenditure has been factored into the two outer years of the operational budget.

1.7 Annual Budget Tables

The following eighteen pages present the ten main budget tables as required in terms of section 8 of the Municipal Budget and Reporting Regulations. These tables set out the municipality's

2015/2016 budget and MTREF as approved by the Council. Each table is accompanied by explanatory notes on the facing page.

Explanatory notes to MBRR Table A1 - Budget Summary

1. Table A1 is a budget summary and provides a concise overview of the Municipality's budget from all of the major financial perspectives (operating, capital expenditure, financial position, cash flow, and MFMA funding compliance).
2. The table provides an overview of the amounts approved by Council for operating performance, resources deployed to capital expenditure, financial position, cash and funding compliance, as well as the municipality's commitment to eliminating basic service delivery backlogs.
3. Financial management reforms emphasises the importance of the municipal budget being funded. This requires the simultaneous assessment of the Financial Performance, Financial Position and Cash Flow Budgets, along with the Capital Budget. The Budget Summary provides the key information in this regard:
 - a. The operating surplus (after Total Expenditure) is positive over the MTREF
 - b. Capital expenditure is balanced by capital funding sources, of which
 - i. Transfers recognised is reflected on the Financial Performance Budget;
 - ii. Borrowing is incorporated in the net cash from financing on the Cash Flow Budget
 - iii. Internally generated funds are financed from a combination of the current operating surplus and accumulated cash-backed surpluses from previous years. The amount is incorporated in the Net cash from investing on the Cash Flow Budget. The fact that the municipality's cash flow remains positive, and is improving indicates that the necessary cash resources are available to fund the Capital Budget.
4. The Cash backing/surplus reconciliation shows that in previous financial years the municipality was not paying much attention to managing this aspect of its finances, and consequently many of its obligations are not cash-backed. This place the municipality in a very vulnerable financial position, as the recent slow-down in revenue collections highlighted. Consequently Council has taken a deliberate decision to ensure adequate cash-backing for all material obligations in accordance with the recently adopted Funding and Reserves Policy. This cannot be achieved in one financial year.
5. Even though the Council is placing great emphasis on securing the financial sustainability of the municipality, this is not being done at the expense of services to the poor. The section of Free Services shows that the amount spent on Free Basic Services and the revenue cost of free services provided by the municipality continues to increase. In addition, the municipality continues to make progress in addressing service delivery backlogs. It is anticipated that by 2017/18 the water backlog will have been eliminated.

Explanatory notes to MBRR Table A2 - Budgeted Financial Performance (revenue and expenditure by standard classification)

1. Table A2 is a view of the budgeted financial performance in relation to revenue and expenditure per standard classification. The modified GFS standard classification divides the municipal services into 4 functional areas. Municipal revenue, operating expenditure and capital expenditure are then classified in terms of each of these functional areas which enables the National Treasury to compile 'whole of government' reports.
2. Note the Total Revenue on this table includes capital revenues (Transfers recognised – capital) and so does not balance to the operating revenue shown on Table A4.
3. Note that as a general principle the revenues for the Trading Services should exceed their expenditures. The table highlights that this is the case for Electricity, Water, Waste water and the Waste management function. As already noted above, the municipality will be undertaking a detailed study of this function to explore ways of improving efficiencies and provide a basis for re-evaluating the function's tariff structure.
4. Other functions that show a deficit between revenue and expenditure are being financed from rates revenues and other revenue sources reflected under the Corporate Services.

Explanatory notes to MBRR Table A3 - Budgeted Financial Performance (revenue and expenditure by municipal vote)

1. Table A3 is a view of the budgeted financial performance in relation to the revenue and expenditure per municipal vote. This table facilitates the view of the budgeted operating performance in relation to the organisational structure of the Municipality. This means it is possible to present the operating surplus or deficit of a vote. The following table is an analysis of the surplus or deficit for the electricity and water trading services.

Table 9 Surplus/(Deficit) calculations for the trading services

VOTE DESCRIPTION	2011/12	2012/13	2013/14	Current Year 2014/15			20115/16 Medium Term Revenue & Expenditure		
	Audited	Audited	Audited	Original	Adjusted	Full Year	Budget		
	Outcome	Outcome	Outcome	Budget	Budget	Forecast	Year 2015/16	+1 2016/17	Budget Year +2 2017/18
ELECTRICITY - Revenue	19,933	36,776	33,840	29,831	29,957	29,957	38,927	39,244	47,925
ELECTRICITY - Expenditure	18,043	32,562	27,935	24,705	25,619	25,619	27,466	29,311	31,338
	1,890	4,214	5,905	5,126	4,338	4,338	11,461	9,933	16,587
% Surplus (Deficit)	9.48%	11.46%	17.45%	17.18%	14.48%	14.48%	29.44%	25.31%	34.61%
WATER - Revenue	38,559	45,269	62,922	51,499	56,283	56,283	62,386	37,527	27,795
WATER - Expenditure	19,564	22,844	23,483	21,289	21,950	21,950	22,094	22,693	23,361
	18,995	22,425	39,439	30,210	34,333	34,333	40,292	14,834	4,434
% Surplus (Deficit)	49.26%	49.54%	62.68%	58.66%	61.00%	61.00%	64.59%	39.53%	15.95%

2. Although there is a 0.42 per cent increase from the 2014/2015 adjustment due to more efficient billing the electricity trading surplus is increasing in 2015/16 from 14.48 per cent to 29.44 per cent and it is decreasing in 2015/16 from 29.44 per cent or R11.461 million in 2015/16 to 25.31 per cent by 2016/17. This is primarily as a result of the high increases in Eskom bulk purchases and the tariff setting policy of the municipality to buffer the impact of these increases on individual consumers.
3. The surplus on the water account increases from 61 per cent in 2014/15 to 64.59 per cent in 2015/16 and is decreasing over the two outer years to 39.53 per cent and 15.95 per cent respectively.

4. Note that the surpluses on these trading accounts are utilised as an internal funding source for the capital programme for asset renewal, refurbishment and the development of new asset infrastructure, *and are not used to cross-subsidise other municipal services.*

Explanatory notes to Table A4 - Budgeted Financial Performance (revenue and expenditure)

1. Total revenue is R119.018 million in 2015/16 and escalates to R125.238 million by 2016/17. This represents a year-on-year an increase of just 9.07 per cent for the 2015/2016 financial year and 5.23 per cent increase for the 2016/17 financial year.
2. Revenue to be generated from property rates is R 8.117 million in the 2015/16 financial year and remains the same by 2016/1 as the property rates tariff won't be increase due to the huge increase in property values in the 2014/15 financial year. This constitute 6.82 per cent of the operating revenue base of the Municipality and therefore remains a significant funding source for the municipality. It remains relatively constant over the medium-term and tariff increases have been factored in at 6 per cent and 6 per cent for each of the respective outer years of the MTREF, while remaining the same for the 2015/2016.
3. Services charges relating to electricity, water, sanitation and refuse removal constitutes the biggest component of the revenue basket of the Municipality totalling R 59.866 million for the 2015/2016 financial year and increasing to R63.897 million by 2016/17. For the 2015/16 financial year services charges amount to 50.29 per cent of the total revenue base and grows by 0.73 per cent over the medium-term. This growth can mainly be attributed to the increase in the bulk prices of electricity and water.
4. Transfers recognised – operating includes the local government equitable share and other operating grants from national and provincial government. It needs to be noted that in real terms the grants receipts from national government are growing rapidly over the MTREF by 2.76 per cent and 2.87 per cent for the two outer years. The percentage share of this revenue source declines due to the more rapid relative growth in service charge revenues.
5. The following graph illustrates the major expenditure items per type.

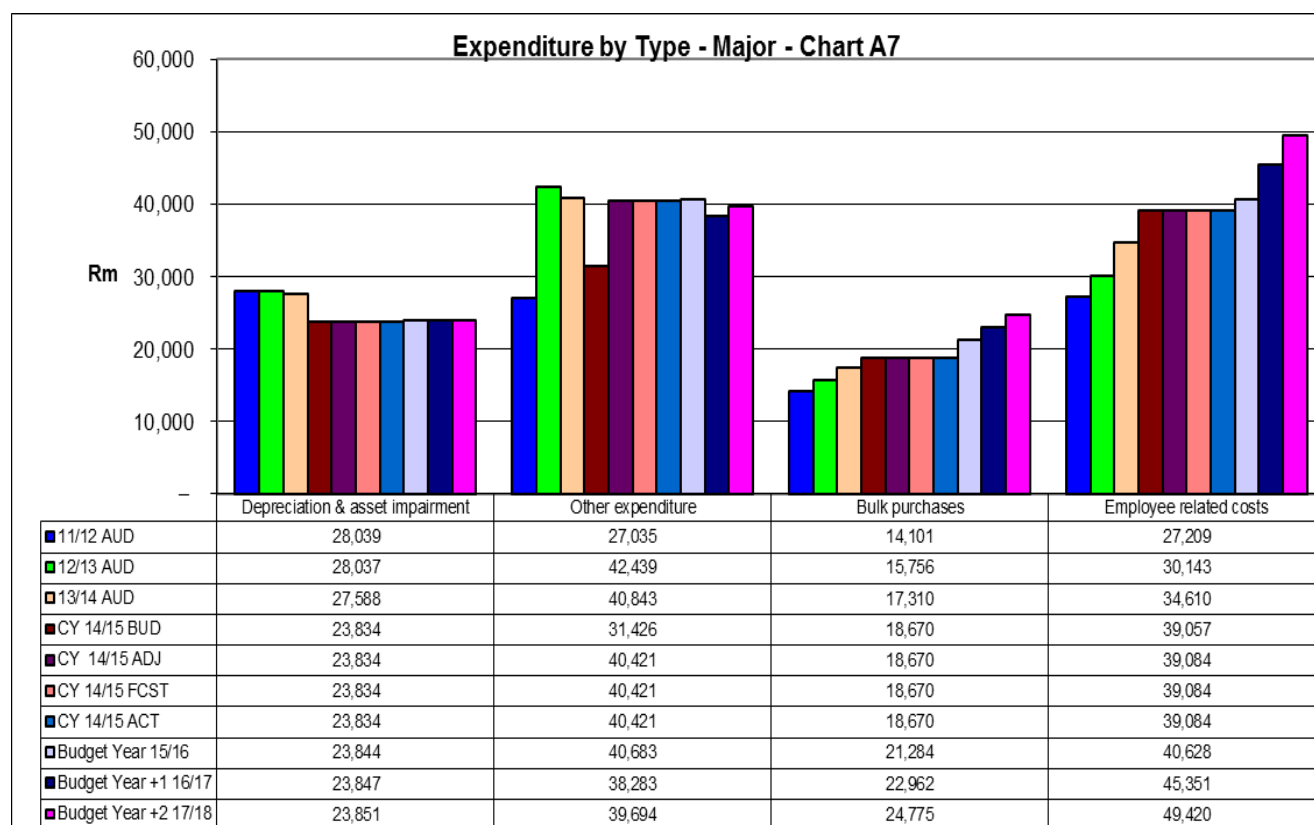

Figure 3 Expenditure by major type

6. Bulk purchases have significantly increased over the 2011/2012 to 2017/18 period escalating from R14.101 million to R24.775 million. These increases can be attributed to the substantial increase in the cost of bulk electricity from Eskom and water from DWAF.
7. Employee related costs and bulk purchases are the main cost drivers within the municipality and alternative operational gains and efficiencies will have to be identified to lessen the impact of wage and bulk tariff increases in future years.

Explanatory notes to Table A5 - Budgeted Capital Expenditure by vote, standard classification and funding source

1. Table A5 is a breakdown of the capital programme in relation to capital expenditure by municipal vote (multi-year and single-year appropriations); capital expenditure by standard classification; and the funding sources necessary to fund the capital budget, including information on capital transfers from national and provincial departments.
2. The MFMA provides that a municipality may approve multi-year or single-year capital budget appropriations.
3. Single-year capital expenditure has been appropriated at R9.550 million for the 2015/2016 financial year and decreases to R5.000 million in the 2016/2017 financial year and increases to R 11.500 million in the 2017/2018 financial year.
4. Unlike multi-year capital appropriations, single-year appropriations relate to expenditure that will be incurred in the specific budget year such as the procurement of vehicles and specialized tools and equipment. The budget appropriations for the two outer years are indicative allocations based on the departmental business plans as informed by the IDP and will be reviewed on an annual basis to assess the relevance of the expenditure in relation to the strategic objectives and service delivery imperatives of the Municipality. For the purpose of funding assessment of the MTREF, these appropriations have been included but no commitments will be incurred against single-year appropriations for the two outer-years.
5. The capital programme is funded from national, provincial grants and transfers and internally generated funds. For 2015/2016, capital transfers totals consist of R57.113 million (97.28 per cent national and 2.72 per cent internally generated) and R26.948 million by 2016/17 (100 per cent). These funding sources are further discussed in detail in 2.6 (Overview of Budget Funding).

Explanatory notes to Table A6 - Budgeted Financial Position

1. Table A6 is consistent with international standards of good financial management practice, and improves understandability for councilors and management of the impact of the budget on the statement of financial position (balance sheet).
2. This format of presenting the statement of financial position is aligned to GRAP1, which is generally aligned to the international version which presents Assets less Liabilities as “accounting” Community Wealth. The order of items within each group illustrates items in order of liquidity; i.e. assets readily converted to cash, or liabilities immediately required to be met from cash, appear first.
3. Table 66 is supported by an extensive table of notes (SA3 which can be found on page 102) providing a detailed analysis of the major components of a number of items, including:
 - Call investments deposits;
 - Consumer debtors;
 - Property, plant and equipment;
 - Trade and other payables;
 - Provisions non-current;
 - Changes in net assets; and
 - Reserves
4. The municipal equivalent of equity is Community Wealth/Equity. The justification is that ownership and the net assets of the municipality belong to the community.
5. Any movement on the Budgeted Financial Performance or the Capital Budget will inevitably impact on the Budgeted Financial Position. As an example, the collection rate assumption will impact on the cash position of the municipality and subsequently inform the level of cash and cash equivalents at year end. Similarly, the collection rate assumption should inform the budget appropriation for debt impairment which in turn would impact on the provision for bad debt. These budget and planning assumptions form a critical link in determining the applicability and relevance of the budget as well as the determination of ratios and financial indicators. In addition the funding compliance assessment is informed directly by forecasting the statement of financial position.

Cash/cash equivalents at the year end:	2	31,995	34,410	39,308	19,168	9,310	9,310	9,310	18,100	25,553	30,712

Explanatory notes to Table A7 - Budgeted Cash Flow Statement

1. The budgeted cash flow statement is the first measurement in determining if the budget is funded.
2. It shows the expected level of cash in-flow versus cash out-flow that is likely to result from the implementation of the budget.
3. It can be seen that the cash levels of the Municipality has been increasing over the 2011/12 to 2013/14 period and decreased in 2014/15 to R9.310 million. It is expected to significantly increase in the MTREF years ranging from R18.100 million in 2015/16 to R30.712 million by 2017/18.
4. The adopted 2015/2016 MTREF provide for a net increase in cash of R8.790 million for the 2015/16 financial year resulting in an overall projected positive cash position of R18.100 million at year end.
5. As part of the 2014/15 mid-year review and Adjustments Budget this unsustainable cash position had to be addressed as a matter of urgency and various interventions were implemented such as the reduction of expenditure allocations and rationalization of spending priorities.
6. In addition the Municipality undertook an extensive debt collection drive resulting in cash receipts on arrear debtors. These interventions translated into an expected net cash position of R9.310 million for the 2014/15 financial year and cash and cash equivalents totaled R9.310 million at year end.
7. The 2015/2016 MTREF has been informed by the planning principle of ensuring adequate cash reserves over the medium-term.
8. Cash and cash equivalents totals R18.100 million as at the end of the 2015/2016 financial year and increases to R25.553 million by 2016/17.

Explanatory notes to Table A8 - Cash Backed Reserves/Accumulated Surplus Reconciliation

1. The cash backed reserves/accumulated surplus reconciliation is aligned to the requirements of MFMA Circular 42 – Funding a Municipal Budget.
2. In essence the table evaluates the funding levels of the budget by firstly forecasting the cash and investments at year end and secondly reconciling the available funding to the liabilities/commitments that exist.
3. The outcome of this exercise would either be a surplus or deficit. A deficit would indicate that the applications exceed the cash and investments available and would be indicative of non-compliance with the MFMA requirements that the municipality's budget must be "funded".
4. Non-compliance with section 18 of the MFMA is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded.
5. From the table it can be seen that for the period 2011/12 to 2013/14 the surplus deteriorated from R26.011 million to R22.378 million and increased to R61.347 million in 2014/15.
6. Considering the requirements of section 18 of the MFMA, it can be concluded that the adopted 2015/16 MTREF was funded owing to the significant remaining surplus.
7. As part of the budgeting and planning guidelines that informed the compilation of the 2015/2016 MTREF the end objective of the medium-term framework was to ensure the budget is funded aligned to section 18 of the MFMA.
8. As can be seen the budget has been modelled to decrease from R61.347 million to R50.739 million by 2015/16 and will decrease to R36.157 million by 2017/18.

Explanatory notes to Table A9 - Asset Management

1. Table A9 provides an overview of municipal capital allocations to building new assets and the renewal of existing assets, as well as spending on repairs and maintenance by asset class.
2. National Treasury has recommended that municipalities should allocate at least 40 per cent of their capital budget to the renewal of existing assets, and allocations to repairs and maintenance should be 8 per cent of PPE. The Municipality does not meet both these recommendations as the focus of resources is on new Basic service infrastructure and repair and maintenance amounts to 0.55 per cent.

Explanatory notes to Table A10 - Basic Service Delivery Measurement

1. Table A10 provides an overview of service delivery levels, including backlogs (below minimum service level), for each of the main services.
2. The Municipality continues to make good progress with the eradication of backlogs:
 - a. Water services – backlog is very small and will be eradicated as soon as a provincial Housing project is completed in three years time. These households are largely found in ‘reception areas’ and will need to be moved to formal areas so that they can receive services.
 - b. Sanitation services – backlog is very small and will be eradicated as soon as a provincial Housing project is completed in three years time.
 - c. Electricity services – backlog will be eradicated over the MTREF. As indicated elsewhere, the emphasis in the electricity sector is on addressing urgent network upgrades.
 - d. Refuse services – backlog does not exist at this stage.
3. The budget provides for 3 782 households to be registered as indigent in 2015/2016, and therefore entitled to receiving Free Basic Services. The number is set to increase to 4032 households given the rapid rate of in-migration to the Municipality, especially by poor people seeking economic opportunities.
4. It is anticipated that these Free Basic Services will cost the municipality R0.747 million per month or R 8.967 million in 2015/2016 increasing to R10.107 million in 2017/18. This is covered by the municipality’s equitable share allocation from national government.

Part 2 – Supporting Documentation

2.1 Overview of the annual budget process

Section 53 of the MFMA requires the Mayor of the municipality to provide general political guidance in the budget process and the setting of priorities that must guide the preparation of the budget. In addition Chapter 2 of the Municipal Budget and Reporting Regulations states that the Mayor of the municipality must establish a Budget Steering Committee to provide technical assistance to the Mayor in discharging the responsibilities set out in section 53 of the Act.

The Budget Steering Committee consists of the Municipal Manager and senior officials of the municipality meeting under the chairpersonship of the MMC for Finance.

The primary aims of the Budget Steering Committee is to ensure:

- that the process followed to compile the budget complies with legislation and good budget practices;
- that there is proper alignment between the policy and service delivery priorities set out in the Municipality's IDP and the budget, taking into account the need to protect the financial sustainability of municipality;
- that the municipality's revenue and tariff setting strategies ensure that the cash resources needed to deliver services are available; and
- that the various spending priorities of the different municipal departments are properly evaluated and prioritised in the allocation of resources.

2.1.1 Budget Process Overview

In terms of section 21 of the MFMA the Mayor is required to table in Council ten months before the start of the new financial year (i.e. in August 2014) a time schedule that sets out the process to revise the IDP and prepare the budget.

The Mayor tabled in Council the required the IDP and budget time schedule on 18 September 2014. Key dates applicable to the process were:

- **August 2014** – Joint strategic planning session of the Mayoral Committee and Executive Management. Aim: to review past performance trends of the capital and operating budgets, the economic realities and to set the prioritisation criteria for the compilation of the 2015/2016 MTREF;
- **November 2014** – Detail departmental budget proposals (capital and operating) submitted to the Budget and Treasury Office for consolidation and assessment against the financial planning guidelines;
- **12 to 26 January 2015** - Review of the financial strategy and key economic and financial planning assumptions by the Budget Steering Committee. This included financial forecasting and scenario considerations;
- **January 2015** – Multi-year budget proposals are submitted to the Mayoral Committee for endorsement;
- **24 February 2015** - Council considers the 2014/15 Mid-year Review and Adjustments Budget;

- **February 2015** - Recommendations of the Mayoral Committee are communicated to the Budget Steering Committee, and on to the respective departments. The draft 2015/16 MTREF is revised accordingly;
- **31 March 2015** - Tabling in Council of the draft 2015/2016 IDP and 2015/2016 MTREF for public consultation;
- **April 2015** – Public consultation;
- **8 May 2015** - Closing date for written comments;
- **8 to 22 May 2015** – finalisation of the 2015/2016 IDP and 2015/2016 MTREF, taking into consideration comments received from the public, comments from National Treasury, and updated information from the most recent Division of Revenue Bill and financial framework; and
- **29 May 2015** - Tabling of the 2015/2016 MTREF before Council for consideration and approval.

There were no deviations from the key dates set out in the Budget Time Schedule tabled in Council.

2.1.2 IDP and Service Delivery and Budget Implementation Plan

This is the third review of the IDP as adopted by Council in May 2012. It started in September 2014 after the tabling of the IDP Process Plan and the Budget Time Schedule for the 2015/2016 MTREF in August.

The Municipality's IDP is its principal strategic planning instrument, which directly guides and informs its planning, budget, management and development actions. This framework is rolled out into objectives, key performance indicators and targets for implementation which directly inform the Service Delivery and Budget Implementation Plan. The Process Plan applicable to the fourth revision cycle included the following key IDP processes and deliverables:

- Registration of community needs;
- Compilation of departmental business plans including key performance indicators and targets;
- Financial planning and budgeting process;
- Public participation process;
- Compilation of the SDBIP, and
- The review of the performance management and monitoring processes.

The IDP has been taken into a business and financial planning process leading up to the 2015/2016 MTREF, based on the approved 2014/15 MTREF, Mid-year Review and adjustments budget. The business planning process has subsequently been refined in the light of current economic circumstances and the resulting revenue projections.

With the compilation of the 2015/2016 MTREF, each department/function had to review the business planning process, including the setting of priorities and targets after reviewing the mid-year and third quarter performance against the 2014/15 Departmental Service Delivery and Budget Implementation Plan. Business planning links back to priority needs and master planning, and essentially informed the detail operating budget appropriations and three-year capital programme.

2.1.3 Financial Modelling and Key Planning Drivers

As part of the compilation of the 2015/16 MTREF, extensive financial modelling was undertaken to ensure affordability and long-term financial sustainability. The following key factors and planning strategies have informed the compilation of the 2015/2016 MTREF:

- Municipality growth
- Policy priorities and strategic objectives
- Asset maintenance
 - Economic climate and trends (i.e. inflation, Eskom increases, household debt, migration patterns)
- Performance trends
- The approved 2014/15 adjustments budget and performance against the SDBIP
- Cash Flow Management Strategy
- Debtor payment levels
- Loan and investment possibilities
 - The need for tariff increases versus the ability of the community to pay for services;
- Improved and sustainable service delivery

In addition to the above, the strategic guidance given in National Treasury's MFMA Circulars 74 and 75 has been taken into consideration in the planning and prioritisation process.

2.1.4 Community Consultation

The draft 2015/2016 MTREF as tabled before Council on 31 March 2015 for community consultation was published on the municipality's website, and hard copies have been made available at customer care offices, municipal notice boards and various libraries. E-mail notifications were sent to all organisations on the municipality's database, including ratepayer associations, community-based organisations and organised business.

All documents in the appropriate format (electronic and printed) have been provided to National Treasury, and other national and provincial departments in accordance with section 23 of the MFMA, to provide an opportunity for them to make inputs.

Ward Committees will be utilized to facilitate the community consultation process from 29 to 30 April 2015, and this includes 3 public briefing sessions. The applicable dates and venues will be published in all the local newspapers and on average attendance of 50 people is expected per meeting. This is up on the previous year's process. This can be attributed to the additional initiatives that were launched during the consultation process, including the specific targeting of ratepayer associations. Individual sessions will be scheduled with organised business and imbizo's will be held to further ensure transparency and interaction. Other stakeholders involved in the consultation includes churches, non-governmental institutions and community-based organisations.

2.2 Overview of alignment of annual budget with IDP

The Constitution mandates local government with the responsibility to exercise local developmental and cooperative governance. The eradication of imbalances in South African society can only be realized through a credible integrated developmental planning process.

Municipalities in South Africa need to utilise integrated development planning as a method to plan future development in their areas and so find the best solutions to achieve sound long-term development goals. A municipal IDP provides a five year strategic programme of action aimed at setting short, medium and long term strategic and budget priorities to create a development platform, which correlates with the term of office of the political incumbents. The plan aligns the resources and the capacity of a municipality to its overall development aims and guides the municipal budget. An IDP is therefore a key instrument which municipalities use to provide vision, leadership and direction to all those that have a role to play in the development of a municipal area. The IDP enables municipalities to make the best use of scarce resources and speed up service delivery.

Integrated developmental planning in the South African context is amongst others, an approach to planning aimed at involving the municipality and the community to jointly find the best solutions towards sustainable development. Furthermore, integrated development planning provides a strategic environment for managing and guiding all planning, development and decision making in the municipality.

It is important that the IDP developed by municipalities correlate with National and Provincial intent. It must aim to co-ordinate the work of local and other spheres of government in a coherent plan to improve the quality of life for all the people living in that area. Applied to the Municipality, issues of national and provincial importance should be reflected in the IDP of the municipality. A clear understanding of such intent is therefore imperative to ensure that the Municipality strategically complies with the key national and provincial priorities.

The aim of this revision cycle was to develop and coordinate a coherent plan to improve the quality of life for all the people living in the area, also reflecting issues of national and provincial importance. One of the key objectives is therefore to ensure that there exists alignment between national and provincial priorities, policies and strategies and the Municipality's response to these requirements.

The national and provincial priorities, policies and strategies of importance include amongst others:

- Green Paper on National Strategic Planning of 2009;
- Government Programme of Action;
- Development Facilitation Act of 1995;
- Provincial Growth and Development Strategy (GGDS);
- National and Provincial spatial development perspectives;
- Relevant sector plans such as transportation, legislation and policy;
- National Key Performance Indicators (NKPIs);
- Accelerated and Shared Growth Initiative (ASGISA);
- National 2014 Vision;
- National Spatial Development Perspective (NSDP) and
- The National Priority Outcomes.

The Constitution requires local government to relate its management, budgeting and planning functions to its objectives. This gives a clear indication of the intended purposes of municipal integrated development planning. Legislation stipulates clearly that a municipality must not only give effect to its IDP, but must also conduct its affairs in a manner which is consistent with its IDP. The following table highlights the IDP's five strategic objectives for the 2014/2015 MTREF and further planning refinements that have directly informed the compilation of the budget:

Table 17 IDP Strategic Objectives

2014/15 Financial Year	2015/2016 MTREF
1. The provision of quality basic services and infrastructure	1. Provision of quality basic services and infrastructure
2. Acceleration of higher and shared economic growth and development	2. Economic growth and development that leads to sustainable job creation
3. Fighting of poverty, building clean, healthy, safe and sustainable communities	3.1 Fight poverty and build clean, healthy, safe and sustainable communities
	3.2 Integrated Social Services for empowered and sustainable communities
4. Fostering participatory democracy and adherence to Umsobomvu principles through a caring, accessible and accountable service	4. Foster participatory democracy and Umsobomvu principles through a caring, accessible and accountable service
5. Good governance, Financial viability and institutional governance	5.1 Promote sound governance
	5.2 Ensure financial sustainability
	5.3 Optimal institutional transformation to ensure capacity to achieve set objectives

In order to ensure integrated and focused service delivery between all spheres of government it was important for the Municipality to align its budget priorities with that of national and provincial government. All spheres of government place a high priority on infrastructure development, economic development and job creation, efficient service delivery, poverty alleviation and building sound institutional arrangements.

Local priorities were identified as part of the IDP review process which is directly aligned to that of the national and provincial priorities. The key performance areas can be summarised as follows against the five strategic objectives:

1. Provision of quality basic services and infrastructure which includes, amongst others:
 - Provide electricity;
 - Provide water;
 - Provide sanitation;
 - Provide waste removal;
 - Provide housing;
 - Provide roads and storm water;
 - Provide Municipality planning services; and
 - Maintaining the infrastructure of the Municipality.

2. Economic growth and development that leads to sustainable job creation by:
 - Ensuring there is a clear structural plan for the Municipality;
 - Ensuring planning processes function in accordance with set timeframes;
 - Facilitating the use of labour intensive approaches in the delivery of services and the building of infrastructure.

- 3.1 Fight poverty and build clean, healthy, safe and sustainable communities:
 - Effective implementation of the Indigent Policy;
 - Working with the provincial department of health to provide primary health care services;
 - Extending waste removal services and ensuring effective Municipality cleansing;
 - Ensuring all waste water treatment works are operating optimally;
 - Working with strategic partners such as SAPS to address crime;
 - Ensuring safe working environments by effective enforcement of building and health regulations;
 - Promote viable, sustainable communities through proper zoning; and
 - Promote environmental sustainability by protecting wetlands and key open spaces.
- 3.2 Integrated Social Services for empowered and sustainable communities
 - Work with provincial departments to ensure the development of community infrastructure such as schools and clinics is properly co-ordinated with the informal settlements upgrade programme
4. Foster participatory democracy and Umsobomvu principles through a caring, accessible and accountable service by:
 - Optimising effective community participation in the ward committee system; and
 - Implementing Umsobomvu in the revenue management strategy.
- 5.1 Promote sound governance through:
 - Publishing the outcomes of all tender processes on the municipal website
- 5.2 Ensure financial sustainability through:
 - Reviewing the use of contracted services
 - Continuing to implement the infrastructure renewal strategy and the repairs and maintenance plan
- 5.3 Optimal institutional transformation to ensure capacity to achieve set objectives
 - Review of the organizational structure to optimize the use of personnel;

In line with the MSA, the IDP constitutes a single, inclusive strategic plan for the Municipality. The five-year programme responds to the development challenges and opportunities faced by the Municipality by identifying the key performance areas to achieve the five the strategic objectives mentioned above.

In addition to the five-year IDP, the Municipality undertakes an extensive planning and developmental strategy which primarily focuses on a longer-term horizon; 15 to 20 years. This process is aimed at influencing the development path by proposing a substantial programme of public-led investment to restructure current patterns of settlement, activity and access to resources in the Municipality so as to promote greater equity and enhanced opportunity. The strategy specifically targets future developmental opportunities in traditional dormitory settlements. It provides direction to the Municipality's IDP, associated sectoral plans and strategies, and the allocation of resources of the Municipality and other service delivery partners.

This development strategy introduces important policy shifts which have further been translated into seven strategic focus areas/objectives as outlined below:

- Developing dormant areas;

- Enforcing hard development lines – so as to direct private investment;
- Maintaining existing urban areas;
- Strengthening key economic clusters;
- Building social cohesion;
- Strong developmental initiatives in relation to the municipal institution as a whole; and
- Sound financial fundamentals.

Lessons learned with previous IDP revision and planning cycles as well as changing environments were taken into consideration in the compilation of the fourth revised IDP, including:

- Strengthening the analysis and strategic planning processes of the Municipality;
- Initiating zonal planning processes that involve the communities in the analysis and planning processes. More emphasis was placed on area based interventions, within the overall holistic framework;
- Ensuring better coordination through a programmatic approach and attempting to focus the budgeting process through planning interventions; and
- Strengthening performance management and monitoring systems in ensuring the objectives and deliverables are achieved.

The 2015/2016 MTREF has therefore been directly informed by the IDP revision process and the following tables provide a reconciliation between the IDP strategic objectives and operating revenue, operating expenditure and capital expenditure.

2.3 Measurable performance objectives and indicators

Performance Management is a system intended to manage and monitor service delivery progress against the identified strategic objectives and priorities. In accordance with legislative requirements and good business practices as informed by the National Framework for Managing Programme Performance Information, the Municipality has developed and implemented a performance management system of which system is constantly refined as the integrated planning process unfolds. The Municipality targets, monitors, assesses and reviews organisational performance which in turn is directly linked to individual employee's performance.

At any given time within government, information from multiple years is being considered; plans and budgets for next year; implementation for the current year; and reporting on last year's performance. Although performance information is reported publicly during the last stage, the performance information process begins when policies are being developed, and continues through each of the planning, budgeting, implementation and reporting stages. The planning, budgeting and reporting cycle can be graphically illustrated as follows:

Figure 4 Planning, budgeting and reporting cycle

The performance of the Municipality relates directly to the extent to which it has achieved success in realising its goals and objectives, complied with legislative requirements and meeting stakeholder expectations. The Municipality therefore has adopted one integrated performance management system which encompasses:

- Planning (setting goals, objectives, targets and benchmarks);
- Monitoring (regular monitoring and checking on the progress against plan);

- Measurement (indicators of success);
- Review (identifying areas requiring change and improvement);
- Reporting (what information, to whom, from whom, how often and for what purpose); and
- Improvement (making changes where necessary).

The performance information concepts used by the Municipality in its integrated performance management system are aligned to the **Framework of Managing Programme Performance Information** issued by the National Treasury:

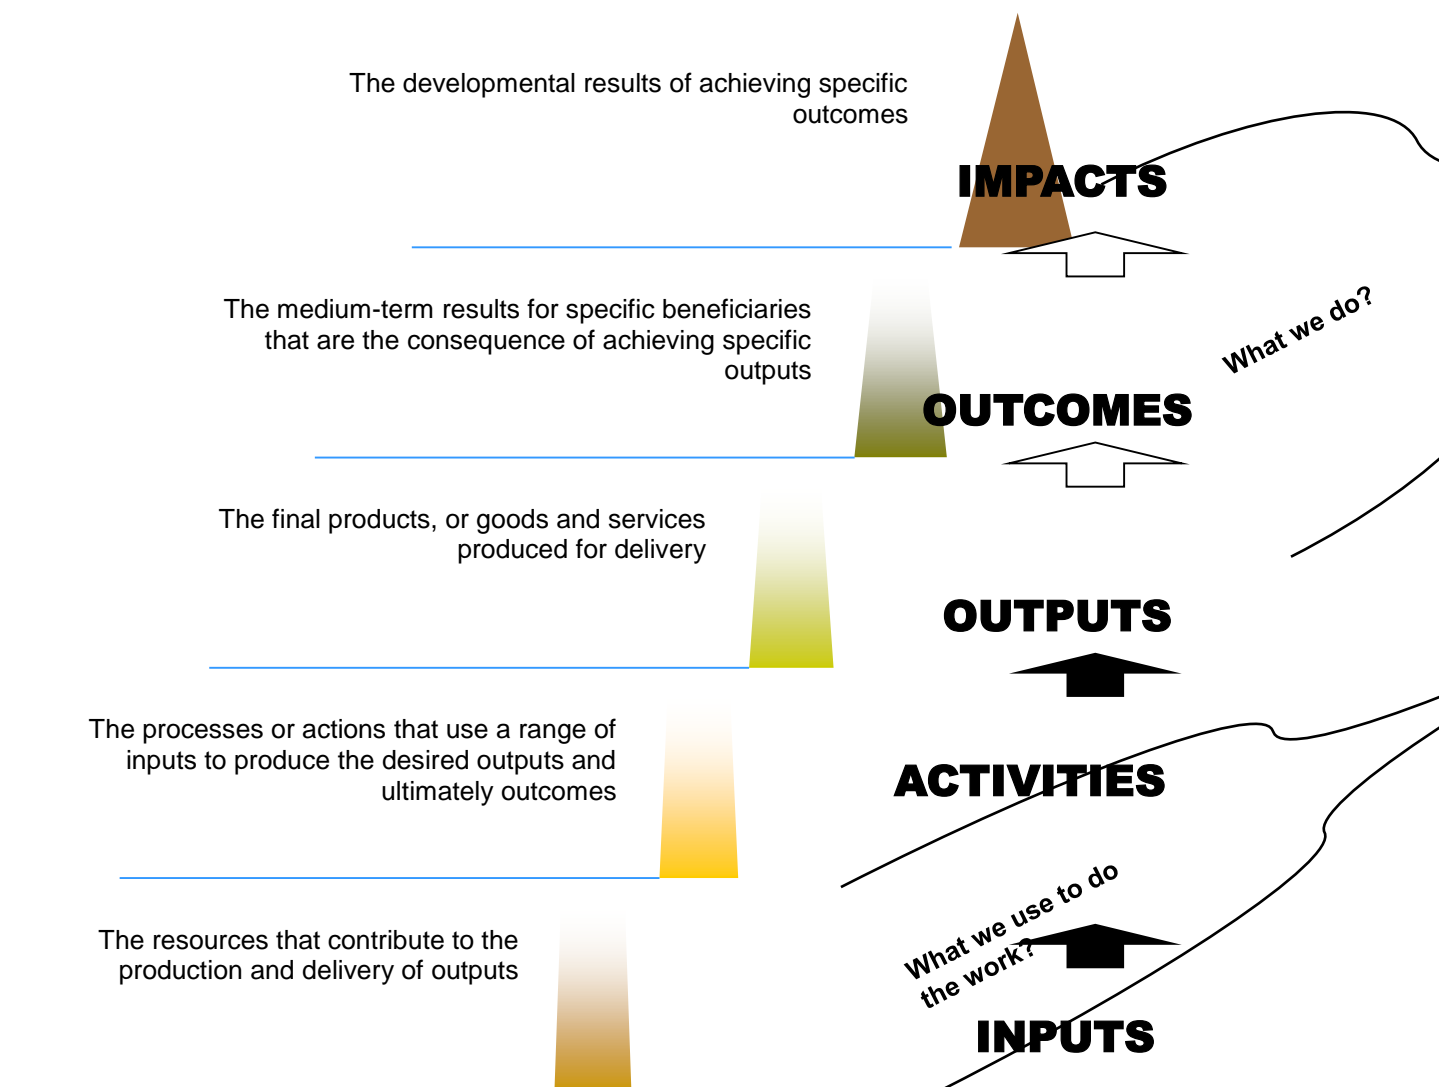

Figure 5 Definition of performance information concepts

The following table provides the main measurable performance objectives the municipality undertakes to achieve this financial year.

2.3.1 Performance indicators and benchmarks

2.3.1.1 Borrowing Management

Capital expenditure in local government can be funded by capital grants, own-source revenue and long term borrowing. The ability of a municipality to raise long term borrowing is largely dependent on its creditworthiness and financial position. As with all other municipalities, Umsobomvu Municipality's borrowing strategy is primarily informed by the affordability of debt repayments. The structure of the Municipality's debt portfolio is dominated by annuity loans. The following financial performance indicators have formed part of the compilation of the 2015/16 MTREF:

- *Capital charges to operating expenditure* are a measure of the cost of borrowing in relation to the operating expenditure. It can be seen that the cost of borrowing is less than .7 per cent in 2015/2016 and remains constant up to 2016/17. While borrowing is considered a prudent financial instrument in financing capital infrastructure development, this indicator will have to be carefully monitored going forward as the Municipality has reached its prudential borrowing limits.
- *Borrowing funding of own capital expenditure* measures the degree to which own capital expenditure (excluding grants and contributions) has been funded by way of borrowing. The average over MTREF is zero per cent which substantiates the above mentioned statement that the Municipality has reached its prudential borrowing limits.

The Municipality's debt profile provides some interesting insights on the Municipality's future borrowing capacity. Firstly, the use of amortising loans leads to high debt service costs at the beginning of the loan, which declines steadily towards the end of the loan's term.

The Municipality has raised mainly amortising loans over the past five years, hence effectively 'front-loading' its debt service costs. This is reflected in the Municipality's debt service profile, which predicts large debt service costs between 2012 and 2017. Debt service costs are expected to peak in 2017 due to the redemption of the last few term loans held by the Municipality.

In summary, various financial risks could have a negative impact on the future borrowing capacity of the municipality. In particular, the continued ability of the Municipality to meet its revenue targets and ensure its forecasted cash flow targets are achieved will be critical in meeting the repayments of the debt service costs. As part of the compilation of the 2015/2016 MTREF the potential of smoothing out the debt profile over the longer term will be investigated.

2.3.1.2 Safety of Capital

- *The debt-to-equity ratio* is a financial ratio indicating the relative proportion of equity and debt used in financing the municipality's assets. The indicator is based on the total of loans, creditors, overdraft and tax provisions as a percentage of funds and reserves.
- *The gearing ratio* is a measure of the total long term borrowings over funds and reserves.

2.3.1.3 Liquidity

- *Current ratio* is a measure of the current assets divided by the current liabilities and as a benchmark the Municipality has set a limit of 1, hence at no point in time should this ratio be less than 1. For the 2015/2016 MTREF the current ratio is 1.68 in the 2015/2016 financial year and 1.55 and 1.50 for the two outer years of the MTREF. Going forward it will be necessary to maintain these levels.

- *The liquidity ratio* is a measure of the ability of the municipality to utilize cash and cash equivalents to extinguish or retire its current liabilities immediately. Ideally the municipality should have the equivalent cash and cash equivalents on hand to meet at least the current liabilities, which should translate into a liquidity ratio of 1. Anything below 1 indicates a shortage in cash to meet creditor obligations. For the 2014/15 financial year the ratio was 0.6 and as part of the financial planning strategy it has been stabilized at 1.73 in the 2015/16 financial year. This needs to be considered a pertinent risk for the municipality as any under collection of revenue will translate into serious financial challenges for the Municipality. As part of the longer term financial planning objectives this ratio will have to be set at a minimum of 1.

2.3.1.4 Revenue Management

- As part of the financial sustainability strategy, an aggressive revenue management framework has been implemented to increase cash inflow, not only from current billings but also from debtors that are in arrears in excess of 90 days. The intention of the strategy is to streamline the revenue value chain by ensuring accurate billing, customer service, credit control and debt collection.

2.3.1.5 Creditors Management

- The Municipality has managed to ensure that creditors are settled within the legislated 30 days of invoice. While the liquidity ratio is of concern, by applying daily cash flow management the municipality has managed to ensure a 100 per cent compliance rate to this legislative obligation. This has had a favourable impact on suppliers' perceptions of risk of doing business with the Municipality, which is expected to benefit the Municipality in the form of more competitive pricing of tenders, as suppliers compete for the Municipality's business.

2.3.1.6 Other Indicators

- Employee costs as a percentage of operating revenue continues to decrease over the MTREF. This is primarily owing to the high increase in bulk purchases which directly increase revenue levels, as well as increased allocation relating to operating grants and transfers.
- Similar to that of employee costs, repairs and maintenance as percentage of operating revenue is also decreasing owing directly to cost drivers such as bulk purchases increasing far above inflation. In real terms, repairs and maintenance has increased as part of the Municipality's strategy to ensure the management of its asset base.

2.3.2 Free Basic Services: basic social services package for indigent households

The social package assists residents that have difficulty paying for services and are registered as indigent households in terms of the Indigent Policy of the Municipality. With the exception of water, only registered indigents qualify for the free basic services.

For the 2015/2016 financial year 3782 registered indigents have been provided for in the budget with this figured increasing to 4032 by 2016/17. In terms of the Municipality's indigent policy

registered households are entitled to 6kl fee water, 50 kwh of electricity, sanitation and free waste removal equivalent to removal once a week, as well as a discount on their property rates.

Further detail relating to the number of households receiving free basic services, the cost of free basic services, highest level of free basic services as well as the revenue cost associated with the free basic services is contained in Table 27 MBRR A10 (Basic Service Delivery Measurement) on page 44.

Note that the number of households in informal areas that receive free services and the cost of these services (e.g. the provision of water through stand pipes, water tankers, etc) are not taken into account in the table noted above.

2.3.3 Providing clean water and managing waste water

The Municipality is the Water Services Authority for the entire municipality in terms of the Water Services Act, 1997 and acts as water services provider. The total water supply of is extracted and treated by the municipality, from rivers and boreholes.

The Department of Water Affairs conducts an annual performance rating of water treatment works, presenting a Blue Drop or Green Drop award respectively to potable water treatment works and waste water treatment works that meet certain criteria of excellence.

- The infrastructure at most of the waste water treatment works is old and insufficient to treat the increased volumes of waste water to the necessary compliance standard;
- Shortage of skilled personnel makes proper operations and maintenance difficult;
- Electrical power supply to some of the plants is often interrupted which hampers the purification processes; and
- There is a lack of proper regional catchment management, resulting in storm water entering the sewerage system.

The following are some of the steps that have been taken to address these challenges:

- Infrastructure shortcomings are being addressed through the capital budget in terms of a 5-year upgrade plan;
- The filling of vacancies has commenced and the Waste Water Division will embark on an in-house training programme, especially for operational personnel;
- The Electricity Division is to install dedicated power supply lines to the plants; and
- The Division is working in consultation with the Department of Water Affairs to address catchment management.

2.4 Overview of budget related-policies

The Municipality's budgeting process is guided and governed by relevant legislation, frameworks, strategies and related policies.

2.4.1 Review of credit control and debt collection procedures/policies

The Collection Policy as approved by Council in May 2014 is currently under review. While the adopted policy is credible, sustainable, manageable and informed by affordability and value for money there has been a need to review certain components to achieve a higher collection rate.

Some of the possible revisions will include the lowering of the credit periods for the down payment of debt. In addition emphasis will be placed on speeding up the indigent registration process to ensure that credit control and debt collection efforts are not fruitlessly wasted on these debtors.

The 2015/2016 MTREF has been prepared on the basis of achieving an average debtors' collection rate of 95 per cent on current billings. In addition the collection of debt in excess of 90 days has been prioritised as a pertinent strategy in increasing the Municipality's cash levels. In addition, a payment incentive scheme has been implemented and has delivered significant results in the recovery of older debt.

2.4.2 Asset Management, Infrastructure Investment and Funding Policy

A proxy for asset consumption can be considered the level of depreciation each asset incurs on an annual basis. Preserving the investment in existing infrastructure needs to be considered a significant strategy in ensuring the future sustainability of infrastructure and the Municipality's revenue base. Within the framework, the need for asset renewal was considered a priority and hence the capital programme was determined based on renewal of current assets versus new asset construction.

Further, continued improvements in technology generally allows many assets to be renewed at a lesser 'real' cost than the original construction cost. Therefore, it is considered prudent to allow for a slightly lesser continual level of annual renewal than the average annual depreciation. The Asset Management Policy is therefore considered a strategic guide in ensuring a sustainable approach to asset renewal, repairs and maintenance and is utilised as a guide to the selection and prioritisation of individual capital projects. In addition the policy prescribes the accounting and administrative policies and procedures relating to property, plant and equipment (fixed assets).

2.4.3 Budget Adjustment Policy

The adjustments budget process is governed by various provisions in the MFMA and is aimed at instilling and establishing an increased level of discipline, responsibility and accountability in the financial management practices of municipalities. To ensure that the Municipality continues to deliver on its core mandate and achieves its developmental goals, the mid-year review and adjustment budget process will be utilised to ensure that underperforming functions are identified and funds redirected to performing functions.

2.4.4 Supply Chain Management Policy

The Supply Chain Management Policy was approved by Council in May 2014. An amended policy will be considered by Council in due course of which the amendments will be extensively consulted on.

2.4.5 Budget Policy

The Budget Policy aims to empower senior managers with an efficient financial and budgetary amendment and control system to ensure optimum service delivery within the legislative

framework of the MFMA and the Municipality's system of delegations. The Budget Policies were approved by Council in May 2014.

2.4.6 Cash Management and Investment Policy

The Municipality's Cash Management and Investment Policy was approved by Council in May 2014. The aim of the policy is to ensure that the Municipality's surplus cash and investments are adequately managed, especially the funds set aside for the cash backing of certain reserves. The policy details the minimum cash and cash equivalents required at any point in time and introduce time frames to achieve certain benchmarks.

2.4.7 Tariff Policies

The Municipality's tariff policies provide a broad framework within which the Council can determine fair, transparent and affordable charges that also promote sustainable service delivery. The policies have been approved on various dates and a consolidated tariff policy is envisaged to be compiled for ease of administration and implementation of the next two years.

2.4.8 Financial Modelling and Scenario Planning Policy

The Financial Modelling and Scenario Planning Policy has directly informed the compilation of the 2014/2015 MTREF with the emphasis on affordability and long-term sustainability. The policy dictates the approach to longer term financial modelling. The outcomes are then filtered into the budget process. The model and scenario planning outcomes are taken to Council every November and then translate into recommendations for the budget guidelines that inform the compilation of the next MTREF. One of the salient features of the policy is the emphasis on financial sustainability. Amongst others, the following has been modelled as part of the financial modelling and scenario planning process:

- Approved 2014/15 Adjustments Budget;
- Cash Flow Management Interventions, Initiatives and Strategies (including the cash backing of reserves);
- Economic climate and trends (i.e. Inflation, household debt levels, indigent factors, growth, recessionary implications);
- Loan and investment possibilities;
- Performance trends;
- Tariff Increases;
- The ability of the community to pay for services (affordability);
- Policy priorities;
- Improved and sustainable service delivery; and
- Debtor payment levels.

All the above policies are available on the Municipality's website, as well as the following budget related policies:

- Property Rates Policy;
- Funding and Reserves Policy;
- Borrowing Policy;
- Budget Policy; and

- Basic Social Services Package (Indigent Policy).

2.5 Overview of budget assumptions

2.5.1 External factors

Domestically, after five years of strong growth, during which about 400 jobs were created, our economy shrank by an estimated 1.8 per cent last. It is expected that recovery from this deterioration will be slow and uneven, and that growth for 2015 will be .7 per cent rising to .8 per cent by 2017.

Owing to the economic slowdown, financial resources are limited due to reduced payment levels by consumers. This has resulted in declining cash inflows, which has necessitated restrained expenditure to ensure that cash outflows remain within the affordability parameters of the Municipality's finances.

2.5.2 General inflation outlook and its impact on the municipal activities

There are five key factors that have been taken into consideration in the compilation of the 2015/2016 MTREF:

- National Government macro-economic targets;
- The general inflationary outlook and the impact on Municipality's residents and businesses;
- The impact of municipal cost drivers;
- The increase in prices for bulk electricity and water; and
- The increase in the cost of remuneration. Employee related costs comprise 30.03 per cent of total operating expenditure in the 2015/2016 MTREF and therefore this increase above inflation places a disproportionate upward pressure on the expenditure budget.

2.5.3 Credit rating outlook

No credit rating have been done by the Municipality

2.5.4 Interest rates for borrowing and investment of funds

The MFMA specifies that borrowing can only be utilised to fund capital or refinancing of borrowing in certain conditions. The Municipality engages in a number of financing arrangements to minimise its interest rate costs and risk. However, for Umsobomvu Municipality the 2015/2016 MTREF is based on the assumption that all borrowings are undertaken using fixed interest rates for amortisation-style loans requiring both regular principal and interest payments. As part of the compilation of the 2015/2016 MTREF the potential of smoothing out the debt profile over the long term will be investigated.

2.5.5 Collection rate for revenue services

The base assumption is that tariff and rating increases will increase at a rate slightly higher than CPI over the long term. It is also assumed that current economic conditions, and relatively controlled inflationary conditions, will continue for the forecasted term.

The rate of revenue collection is currently expressed as a percentage (85 per cent) of annual billings. Cash flow is assumed to be 85 per cent of billings, plus an increased collection of arrear debt from the revised collection and credit control policy. The performance of arrear collections will however only be considered a source of additional cash in-flow once the performance has been carefully monitored.

2.5.6 Growth or decline in tax base of the municipality

Debtors revenue is assumed to increase at a rate that is influenced by the consumer debtors collection rate, tariff/rate pricing, real growth rate of the Municipality, household formation growth rate and the poor household change rate.

Household formation is the key factor in measuring municipal revenue and expenditure growth, as servicing 'households' is a greater municipal service factor than servicing individuals. Household formation rates are assumed to convert to household dwellings. In addition the change in the number of poor households influences the net revenue benefit derived from household formation growth, as it assumes that the same costs incurred for servicing the household exist, but that no consumer revenue is derived as the 'poor household' limits consumption to the level of free basic services.

2.5.7 Salary increases

In the absence of a collective agreement regarding salaries/wages, a provision of 4.4 per cent has been made for the 2015/16 financial year.

2.5.8 Impact of national, provincial and local policies

Integration of service delivery between national, provincial and local government is critical to ensure focussed service delivery and in this regard various measures were implemented to align IDPs, provincial and national strategies around priority spatial interventions. In this regard, the following national priorities form the basis of all integration initiatives:

- Creating jobs;
- Enhancing education and skill development;
- Improving Health services;
- Rural development and agriculture; and
- Fighting crime and corruption.

To achieve these priorities integration mechanisms are in place to ensure integrated planning and execution of various development programs. The focus will be to strengthen the link between policy priorities and expenditure thereby ensuring the achievement of the national, provincial and local objectives.

2.5.9 Ability of the municipality to spend and deliver on the programmes

It is estimated that a spending rate of at least 97 per cent is achieved on operating expenditure and 100 per cent on the capital programme for the 2015/2016 MTREF of which performance has been factored into the cash flow budget.

2.6 Overview of budget funding

2.6.1 Medium-term outlook: operating revenue

The following table is a breakdown of the operating revenue over the medium-term:

Description R Thousand	2015/16 Medium Term Revenue & Expenditure Framework						
	Budget Year 2014/15	%	Budget Year + 1 2015/16	%	Budget Year+2 2016/17	%	Budget Year+2 2017/18
Property Rates	8,116,592	-	8,116,592.00	6.0	8,603,587.00	6.0	9,119,803.00
Service Charges	54,011,234	10.8	59,868,215.00	6.7	63,896,879.00	6.2	67,851,326.00
Investment Revenue	422,000	-	422,000.00	-	422,000.00	-	422,000.00
Transfers Recognised - Operational	36,664,400	8.9	39,918,700.00	2.8	41,019,200.00	2.9	42,197,400.00
Other Own Revenue	4,285,037	0.1	4,290,700.00	9.4	4,694,925.00	0.1	4,701,335.00
Total Operating Revenue (Excluding Capital Transfers And Contributions)	109,125,311	9.1	119,018,037.00	5.2	125,237,789.00	4.8	131,220,984.00
Total operating Expenditure	130,553,134	3.6	135,300,217.00	3.3	139,786,721.00	5.5	147,448,025.00
Surplus / Deficit	29,403,777	33.6	39,281,120.00	(68.4)	12,398,868.00	(46.7)	6,604,559.00

The following graph is a breakdown of the operational revenue per main category for the 2015/16 financial year.

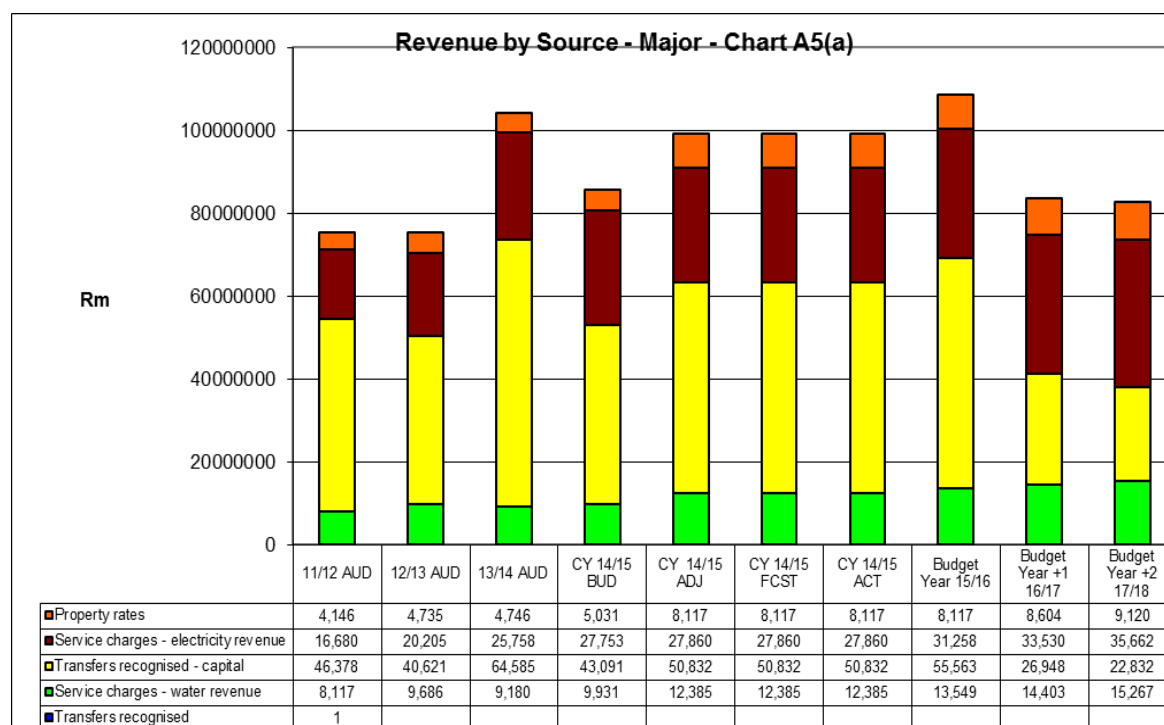

Figure 6 Breakdown of operating revenue over the 2014/15 MTREF

Tariff setting plays a major role in ensuring desired levels of revenue. Getting tariffs right assists in the compilation of a credible and funded budget. The Municipality derives most of its operational revenue from the provision of goods and services such as water, electricity, sanitation and solid waste removal. Property rates, operating and capital grants from organs of state and other minor charges (such as building plan fees, licenses and permits etc).

The revenue strategy is a function of key components such as:

- Growth in the Municipality and economic development;
- Revenue management and enhancement;
- Achievement of a 95 per cent annual collection rate for consumer revenue;
- National Treasury guidelines;
- Electricity tariff increases within the National Electricity Regulator of South Africa (NERSA) approval;
- Achievement of full cost recovery of specific user charges;
- Determining tariff escalation rate by establishing/calculating revenue requirements;
- The Property Rates Policy in terms of the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA), and
- And the ability to extend new services and obtain cost recovery levels.

The above principles guide the annual increase in the tariffs charged to the consumers and the ratepayers aligned to the economic forecasts.

The proposed tariff increases for the 2014/15 MTREF on the different revenue categories are:

Table 33 Proposed Tariff Increase Over The Medium-term

Revenue Category	2015/16 Proposed Tariff Increase	2016/17 Proposed Tariff Increase	2017/18 Proposed Tariff Increase	2015/16 Additional Revenue for Each 1% Tariff Increase	2016/17 Additional Revenue Owing To 1% Tariff Increase	2017/18 Total Budgeted Revenue
	%	%	%	R'000	R'000	R'000
Property Rates	0.00%	6.00%	6.00%	R -	R 487	R 516
Sanitation	6.00%	6.00%	6.00%	R 732	R 511	R 542
Solid Waste	6.00%	6.00%	6.00%	R 562	R 392	R 416
Water	6.00%	6.00%	6.00%	R 1,164	R 854	R 864
Electricity	12.20%	7.00%	7.00%	R 3,399	R 2,272	R 2,133
Total				R 5,857	R 4,516	R 4,471

Revenue to be generated from property rates is R 8.117 million in the 2015/16 financial year and increases to R 9.120 million by 2017/18 which represents 6.82 per cent of the operating revenue base of the Municipality. It remains relatively constant over the medium-term. With the implementation of the Municipal Property Rates Act the basis of rating significantly changed.

The Municipality is still in a process of further data verification and validation relating to the valuation roll. As the levying of property rates is considered a strategic revenue source a general valuation process was undertaken in the 2014/15 financial year. The outcome of this initiative is closely monitored and reported on a regular basis as part of the quarterly performance reporting.

Services charges relating to electricity, water, sanitation and refuse removal constitutes the biggest component of the revenue basket of the Municipality totalling R59.868 million for the 2015/16 financial year and increasing to R63.897 million by 2016/17. For the 2015/16 financial year services charges amount to 50.30 per cent of the total revenue base and grows by 0.72 and 0.70 per cent per annum over the medium-term. This growth can mainly be attributed to the increase in the bulk prices of electricity and water.

Operational grants and subsidies amount to R39.919 million, R41.019 million and R42.197 million for each of the respective financial years of the MTREF, or 31.02, 32.75 and 32.16 per cent of operating revenue. The percentage of the total operational grants and transfers in relation to the total operating revenue is increasing owing to the high increases in revenue relating to services charges.

Investment revenue contributes marginally to the revenue base of the Municipality.

The tables below provide detail investment information and investment particulars by maturity.

For the medium-term, the funding strategy has been informed directly by ensuring financial sustainability and continuity. Medium-term outlook: capital revenue

The following table is a breakdown of the funding composition of the 2015/16 medium-term capital programme:

Table 25 Sources of capital revenue over the MTREF

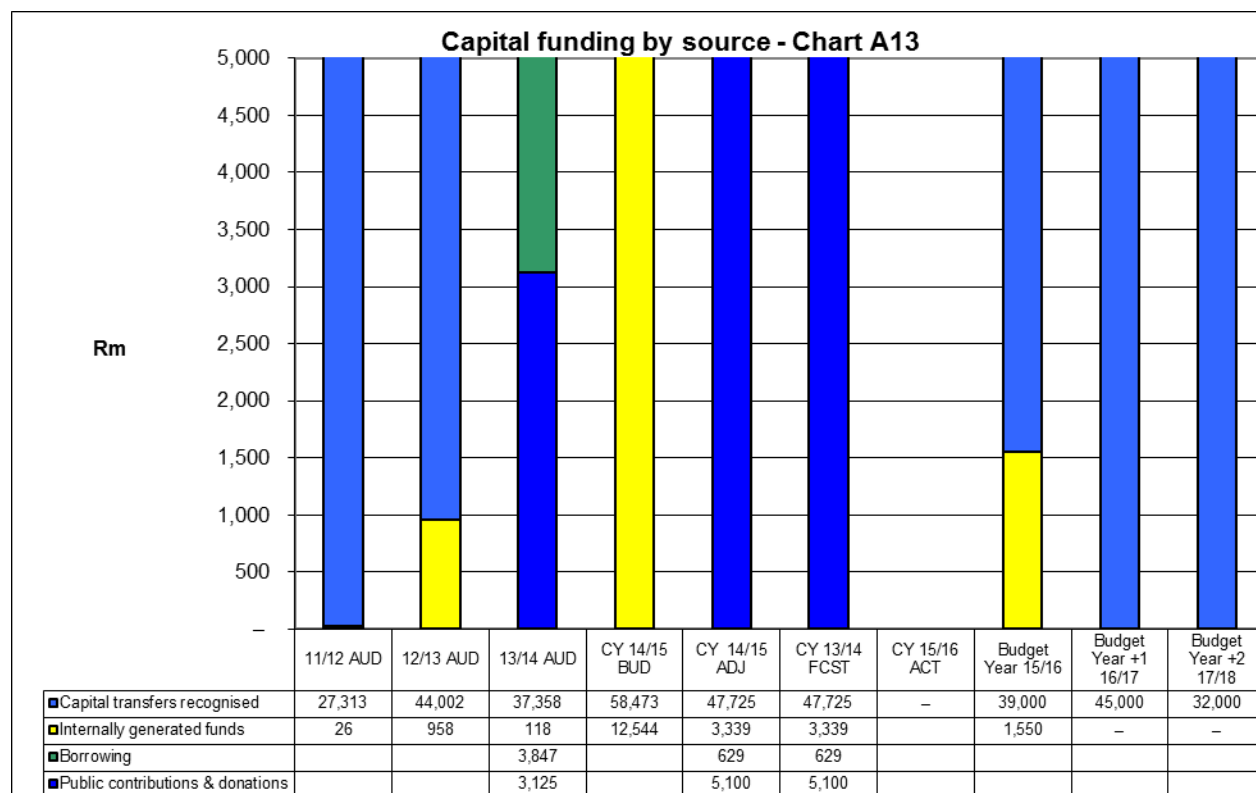

Figure 7 Sources of capital revenue for the 2013/14 financial year

Capital grants and receipts equates to 97.29 per cent of the total funding source which represents R55.563 million for the 2015/16 financial year and decrease to R26.948 million by 2016/17. Grants are decreasing by 48.50 per cent over the medium-term.

Borrowing still remains an insignificant funding source for the capital programme over the medium-term. As explained earlier, the borrowing capacity of the Municipality has essentially reached its limits and going forward borrowing limits will remain constant.

The following table is a detailed analysis of the Municipality’s borrowing liability.

2.6.2 Cash Flow Management

Cash flow management and forecasting is a critical step in determining if the budget is funded over the medium-term. The table below is consistent with international standards of good financial management practice and also improves understandability for councillors and management. Some specific features include:

- Clear separation of receipts and payments within each cash flow category;
- Clear separation of capital and operating receipts from government, which also enables cash from 'Ratepayers and other' to be provide for as cash inflow based on actual performance. In other words the *actual collection rate* of billed revenue., and
- Separation of borrowing and loan repayments (no set-off), to assist with MFMA compliance assessment regarding the use of long term borrowing (debt).

NET INCREASE/ (DECREASE) IN CASH HELD		30,489	2,415	13,712	3,556	(6,302)	(6,302)	(6,302)	8,790	7,453	5,159
Cash/cash equivalents at the year begin:	2	1,506	31,995	25,596	15,612	15,612	15,612	15,612	9,310	18,100	25,553
Cash/cash equivalents at the year end:	2	31,995	34,410	39,308	19,168	9,310	9,310	9,310	18,100	25,553	30,712

The adopted 2015/2016 MTREF provide for a further net increase in cash of R8.790 million for the 2015/16 MTREF year resulting in an overall projected positive cash position of R18.100 million at year end.

2.6.3 Cash Backed Reserves/Accumulated Surplus Reconciliation

This following table meets the requirements of MFMA Circular 42 which deals with the funding of a municipal budget in accordance with sections 18 and 19 of the MFMA. The table seeks to answer three key questions regarding the use and availability of cash:

- What are the predicted cash and investments that are available at the end of the budget year?
- How are those funds used?
- What is the net funds available or funding shortfall?

A surplus would indicate the cash-backed accumulated surplus that was/is available. A shortfall (applications > cash and investments) is indicative of non-compliance with section 18 of the MFMA requirement that the municipality’s budget must be ‘funded’. Non-compliance with section 18 is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded (budgeted spending is greater than funds available or to be collected). It is also important to analyse trends to understand the consequences, e.g. the budget year might indicate a small surplus situation, which in itself is an appropriate outcome, but if in prior years there were much larger surpluses then this negative trend may be a concern that requires closer examination.

The cash backed reserves/accumulated surplus reconciliation is aligned to the requirements of MFMA Circular 42 – Funding a Municipal Budget. In essence the table evaluates the funding levels of the budget by firstly forecasting the cash and investments at year end and secondly reconciling the available funding to the liabilities/commitments that exist. The outcome of this exercise would either be a surplus or deficit. A deficit would indicate that the applications exceed the cash and investments available and would be indicative of non-compliance with the MFMA requirements that the municipality’s budget must be “funded”. Non-compliance with section 18 of the MFMA is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded.

2.6.4 Funding compliance measurement

National Treasury requires that the municipality assess its financial sustainability against fourteen different measures that look at various aspects of the financial health of the municipality. These measures are contained in the following table. All the information comes directly from the annual budgeted statements of financial performance, financial position and cash flows. The funding

compliance measurement table essentially measures the degree to which the proposed budget complies with the funding requirements of the MFMA. Each of the measures is discussed below.

MTREF Funded ✓ / Unfunded ✗			15	✓	✓	✓	✓	✓	✓	✓	✓	✓

2.6.4.1 Cash/cash equivalent position

The Municipality's forecast cash position was discussed as part of the budgeted cash flow statement. A 'positive' cash position, for each year of the MTREF would generally be a minimum requirement, subject to the planned application of these funds such as cash-backing of reserves and working capital requirements.

If the municipality's forecast cash position is negative, for any year of the medium term budget, the budget is very unlikely to meet MFMA requirements or be sustainable and could indicate a risk of non-compliance with section 45 of the MFMA which deals with the repayment of short term debt at the end of the financial year. The forecasted cash and cash equivalents for the 2015/2016 MTREF shows R18.100 million, R25.553 million and R30.712 million for each respective financial year.

2.6.4.2 Cash plus investments less application of funds

The purpose of this measure is to understand how the municipality has applied the available cash and investments as identified in the budgeted cash flow statement. The detail reconciliation of the cash backed reserves/surpluses is contained in Table 25, on page 25. The reconciliation is intended to be a relatively simple methodology for understanding the budgeted amount of cash and investments available with any planned or required applications to be made. This has been extensively discussed above.

2.6.4.3 Monthly average payments covered by cash or cash equivalents

The purpose of this measure is to understand the level of financial risk should the municipality be under stress from a collection and cash in-flow perspective. Regardless of the annual cash position an evaluation should be made of the ability of the Municipality to meet monthly payments as and when they fall due. It is especially important to consider the position should the municipality be faced with an unexpected disaster that threatens revenue collection such as rate boycotts. As part of the 2014/2015 MTREF the municipalities improving cash position causes the ratio to move upwards. As indicated above the Municipality aims to achieve at least one month's cash coverage in the medium term, and then gradually move towards two months coverage. This measure will have to be carefully monitored going forward.

2.6.4.4 Surplus/deficit excluding depreciation offsets

The main purpose of this measure is to understand if the revenue levels are sufficient to conclude that the community is making a sufficient contribution for the municipal resources consumed each year. An 'adjusted' surplus/deficit is achieved by offsetting the amount of depreciation related to externally funded assets. Municipalities need to assess the result of this calculation taking into consideration its own circumstances and levels of backlogs. If the outcome is a deficit, it may indicate that rates and service charges are insufficient to ensure that the community is making a sufficient contribution toward the economic benefits they are consuming over the medium term. For the 2015/2016 MTREF the indicative outcome is a surplus of R38.912 million, R12.399 million and R6.605 million.

It needs to be noted that a surplus does not necessarily mean that the budget is funded from a cash flow perspective and the first two measures in the table are therefore critical.

2.6.4.5 Property Rates/service charge revenue as a percentage increase less macro inflation target

The purpose of this measure is to understand whether the municipality is contributing appropriately to the achievement of national inflation targets. This measure is based on the increase in 'revenue', which will include both the change in the tariff as well as any assumption about real growth such as new property development, services consumption growth etc.

The factor is calculated by deducting the maximum macro-economic inflation target increase (which is currently 3 - 6 per cent). The result is intended to be an approximation of the real increase in revenue. From the table above it can be seen that the percentage growth totals 2.4 8.9 and declines .2 per cent for the respective financial year of the 2015/2016 MTREF. Considering the lowest percentage tariff increase in relation to revenue generated from rates and services charges is 6 per cent, with the increase in electricity at 12.2 per cent it is to be expected that the increase in revenue will exceed the inflation target figures. However, the outcome is lower than it might be due to the slowdown in the economy and a reduction in consumption patterns. This trend will have to be carefully monitored and managed with the implementation of the budget.

2.6.4.6 Cash receipts as a percentage of ratepayer and other revenue

This factor is a macro measure of the rate at which funds are 'collected'. This measure is intended to analyse the underlying assumed collection rate for the MTREF to determine the relevance and credibility of the budget assumptions contained in the budget. It can be seen that the outcome is at 97.4, 97.2 and 97.2 per cent for each of the respective financial years. Given that the assumed collection rate was based on a 95 per cent performance target, the cash flow statement has been conservatively determined. In addition the risks associated with objections to the valuation roll need to be clarified and hence the conservative approach, also taking into consideration the cash flow challenges experienced in the current financial year. This measure and performance objective will have to be meticulously managed. Should performance with the mid-year review and adjustments be positive in relation to actual collections of billed revenue, the adjustments budget will be amended accordingly.

2.6.4.7 Debt impairment expense as a percentage of billable revenue

This factor measures whether the provision for debt impairment is being adequately funded and is based on the underlying assumption that the provision for debt impairment (doubtful and bad debts) has to be increased to offset under-collection of billed revenues. The provision has been appropriated at 4.1, 4.0 and 4.0 per cent over the MTREF. Considering the debt incentive scheme and the municipality's revenue management strategy's objective to collect outstanding debtors of 90 days, the provision is well within the accepted leading practice.

2.6.4.8 Capital payments percentage of capital expenditure

The purpose of this measure is to determine whether the timing of payments has been taken into consideration when forecasting the cash position. It can be seen that a 2 per cent timing discount has been factored into the cash position forecasted over the entire financial year. The municipality aims to keep this as low as possible through strict compliance with the legislative requirement that debtors be paid within 30 days.

2.6.4.9 Borrowing as a percentage of capital expenditure (excluding transfers, grants and contributions)

The purpose of this measurement is to determine the proportion of a municipality's 'own-funded' capital expenditure budget that is being funded from borrowed funds to confirm MFMA compliance. Externally funded expenditure (by transfers/grants and contributions) has been excluded. Further details relating to the borrowing strategy of the Municipality can be found on page 66.

2.6.4.10 Transfers/grants revenue as a percentage of Government transfers/grants available

The purpose of this measurement is mainly to ensure that all available transfers from national and provincial government have been budgeted for. A percentage less than 100 per cent could indicate that not all grants as contained in the Division of Revenue Act (DoRA) have been budgeted for. The Municipality has budgeted for all transfers.

2.6.4.11 Consumer debtors change (Current and Non-current)

The purpose of these measures are to ascertain whether budgeted reductions in outstanding debtors are realistic. There are 2 measures shown for this factor; the change in current debtors and the change in long term receivables, both from the Budgeted Financial Position. Both measures show a relatively stable trend in line with the Municipality's policy of settling debtors' accounts within 30 days.

2.6.4.12 Repairs and maintenance expenditure level

This measure must be considered important within the context of the funding measures criteria because a trend that indicates insufficient funds are being committed to asset repair could also indicate that the overall budget is not credible and/or sustainable in the medium to long term because the revenue budget is not being protected. Details of the Municipality's strategy pertaining to asset management and repairs and maintenance is contained in Table 60 MBRR SA34C on page 90.

2.6.4.13 Asset renewal/rehabilitation expenditure level

This measure has a similar objective to aforementioned objective relating to repairs and maintenance. A requirement of the detailed capital budget (since MFMA Circular 28 which was issued in December 2005) is to categorise each capital project as a new asset or a renewal/rehabilitation project. The objective is to summarise and understand the proportion of budgets being provided for new assets and also asset sustainability. A declining or low level of renewal funding may indicate that a budget is not credible and/or sustainable and future revenue is not being protected, similar to the justification for 'repairs and maintenance' budgets. Further details in this regard are contained in Table 59 MBRR SA34b on page 89.

2.10 Annual budgets and SDBIPs – internal departments

The draft SDBIP is attached

2.11 Contracts having future budgetary implications

In terms of the Municipality's Supply Chain Management Policy, no contracts are awarded beyond the medium-term revenue and expenditure framework (three years). In ensuring adherence to this contractual time frame limitation, all reports submitted to either the Bid Evaluation and Adjudication Committees must obtain formal financial comments from the Financial Management Division of the Treasury Department.

2.12 Capital expenditure details

The following three tables present details of the Municipality's capital expenditure programme, firstly on new assets, then the renewal of assets and finally on the repair and maintenance of assets.

Table 42 MBRR SA 34a - Capital expenditure on new assets by asset class

Table 46 MBRR SA37 - Projects delayed from previous financial year

None

2.13 Legislation compliance status

Compliance with the MFMA implementation requirements have been substantially adhered to through the following activities:

1. In year reporting
Reporting to National Treasury in electronic format was fully complied with on a monthly basis. Section 71 reporting to the Executive Mayor (within 10 working days) has progressively improved and includes monthly published financial performance on the Municipality's website.
2. Internship programme
The Municipality is participating in the Municipal Financial Management Internship programme and has employed five interns undergoing training in various divisions of the Financial Services Department.
3. Budget and Treasury Office
The Budget and Treasury Office has been established in accordance with the MFMA.
4. Audit Committee
An Audit Committee has been established and is fully functional.
5. Service Delivery and Implementation Plan
The detail SDBIP document is at a draft stage and will be finalised after approval of the 2015/16 MTREF in May 2014 directly aligned and informed by the 2015/2016 MTREF.
6. Annual Report
Annual report is compiled in terms of the MFMA and National Treasury requirements.
7. MFMA Training
The MFMA training module in electronic format is presented at the Municipality's internal centre and training is ongoing.
8. Policies
An amendment of the Municipal Property Rates Regulations as published in Government Notice 363 of 27 March 2009, was announced in Government Gazette 33016 on 12 March 2010. The ratios as prescribed in the Regulations have been complied with.
